3NT by North

Then unblock your ♦ A J. Next play ♣ K. (on which West discards), and a small ♣ toward dummy's ♣ J 9. You are sure to have a ♣ entry to dummy's ♦ s, and you will still get three ♣ tricks, just a different three.

Suppose the opening lead had been a ♦ rather than a ♣.

You probably would have played the hand the same way you just did, unblock ♦ s, then play ♣ A K and a low ♣ toward the ♣ J 9 trying to get a ♣ entry to dummy.

It is only because the ♣ opening lead gives you the chance for a Cheap-Trick that you are tempted to go wrong.

North is to play 3NT. East leads the ♣ 5. You play low from dummy and West plays the ♣ 6.

Winners: ♠ = 1 ♥ = 1 ♦ = 4? ♣ = 3 Total = 9

Although you have 4 ♦ winners, getting to the last couple might not be so easy. You can make 3 ♦ tricks simply by winning your ♦ A, then overtaking your ♦ J with dummy's ♦ Q. But you need that fourth ♦ winner. Can you get it?

Sure you can, by creating an entry in ♣ s. It is likely from the opening lead, (and West's play of a small card), that East has led from ♣ Q 10 7 5. If you win the first trick cheaply then you will still make your ♣ A K for three ♣ tricks in all.

So don't win cheaply, win the first trick with the ♣ A. Then unblock your ♦ A J. Next play ♣ K. (on which West discards), and a small ♣ toward dummy's ♣ J 9. You are sure to have a ♣ entry to dummy's ♦ s, and you will still get three ♣ tricks, just a different three.

Maybe in ♦s. Play the ♦K, then ♦Q, watching the defender's cards carefully. When both follow twice you know there is only a single ♦ left out, so you play the ♦J to dummy's ♦A. Now take the ♣ finesse. It works! Next play your ♦5 to dummy's ♦6 and take another ♣ finesse. Both defenders follow so your ♣s are good.

If the ♦s split 4-1 you would have found out when you cashed the ♦K Q.

Then your chance of success goes way down. You would have to find North with the doubleton ♣K.

East is to play 3NT. South leads the ♠Q. North plays the ♠K, then the ♠2 when you hold up.

Winners: ♠=1 ♥=0 ♦=4 ♣=1 Total = 6

You are going to have to be pretty lucky to make this contract. You cannot touch the ♥ suit because a defender would take the ♥A and it would start raining ♠s.

So you will have to get 3 extra ♣ winners, which means the ♣ finesse absolutely MUST work.

In addition to lucky, you are going to have to be pretty good, too. You will surely have to finesse the ♣s at least twice; that means you need two dummy entries. Can you find them?
