| 3NT by North |       |      |       |

North is to play 3NT. East leads the ♠ 5.

Winners: ♠=3 ♥=1 ♦=1 ♣=2 Total = 7

Needing two winners you will naturally consider your 5-card ♣ suit. After unblocking the ♣ A K you will need two entries to your hand; one to lead the ♣ J and drive out the ♣ Q, then a second to enjoy your good ♣ s.

The ♠ suit will provide one entry easily, but should you depend on the ♥ Q for the second entry?

No, for two reasons. Firstly the ♥ Q only gives you a 50% chance of being an entry. But more importantly, you already have your two sure entries in ♠ s. As long as you take the first trick with dummy's ♠ A both your ♠ K and ♠ J can be entries.

Win the ♠ A. Play off dummy's ♣ A K. Lead the ♠ 9 to your ♠ J. Play your ♣ J (and another one if necessary) to establish the ♣ suit. Win whatever red card they play next with dummy's Ace. Play the ♠ Q to your ♠ K and cash your established ! C(s). Dummy's other red Ace will be your ninth trick.

The more you make a point of looking for entries the easier they are to find.

You'd have to be very careless to miss this one.

3NT by South

Then unblock your ♦ A J. Next play ♣ K. (on which East discards), and a small ♣ toward dummy's ♣ J 9. You are sure to have a ♣ entry to dummy's ♦ s, and you will still get three ♣ tricks, just a different three.

Suppose the opening lead had been a ♦ rather than a ♣.

You probably would have played the hand the same way you just did, unblock ♦ s, then play ♣ A K and a low ♣ toward the ♣ J 9 trying to get a ♣ entry to dummy.

It is only because the ♣ opening lead gives you the chance for a Cheap-Trick that you are tempted to go wrong.

South is to play 3NT. West leads the ♣ 5. You play low from dummy and East plays the ♣ 6.

Winners: ♠ = 1 ♥ = 1 ♦ = 4? ♣ = 3 Total = 9

Although you have 4 ♦ winners, getting to the last couple might not be so easy. You can make 3 ♦ tricks simply by winning your ♦ A, then overtaking your ♦ J with dummy's ♦ Q. But you need that fourth ♦ winner. Can you get it?

Sure you can, by creating an entry in ♣ s. It is likely from the opening lead, (and East's play of a small card), that West has led from ♣ Q 10 7 5. If you win the first trick cheaply then you will still make your ♣ A K for three ♣ tricks in all.

So don't win cheaply, win the first trick with the ♣ A. Then unblock your ♦ A J. Next play ♣ K. (on which East discards), and a small ♣ toward dummy's ♣ J 9. You are sure to have a ♣ entry to dummy's ♦ s, and you will still get three ♣ tricks, just a different three.
