glad you played so carefully. Play one more ♠, finessing West's ♠K again, then play your ♠A and the rest of your winners.

If you had played the ♠Q and carelessly followed with the ♠8 on your first finesse you would have gone down. You would have had to win the second finesse in your hand and would have no dummy entry to let you take the third finesse.

True, the chances of West holding 4 ♠s to the King are pretty small, but it costs you nothing to protect yourself against that holding.

And the rewards are great.

North is to play 4♠. East leads the ♦2. The defenders win 3 ♦ tricks, then play a ♣.

Losers: ♠ = 0 or 1 ♥ = 0 ♦ = 3 ♣ = 0 Total = 3 or 4

Since you have already lost 3 ♦ tricks you cannot also lose a ♠ trick. That means West will have to have the ♠K and it also means that you will have to be careful with your finessing.

In your hand with a ♣ you play over to dummy's ♥A. Now lead the ♠Q from dummy and when West plays low play the ♠J (or 10) from your hand.

The ♠Q held the trick so you are still in dummy. Play the ♠9, and when West doesn't cover, play your ♠8 under it. East shows out on this trick and you are

of your winners.

far and you have 4 more winners ready to take. So you can take your 9 tricks and run, or you can finesse the ♣ trying for 3 overtricks.

It's your decision, but </br></br>

At Rubber Bridge or Team play it would probably be foolish to risk your contract for the sake of three overtricks.

But at Match Point Pairs the reward would be much greater, a probable very high board. Of course with this layout it might have gotten you a bottom board.

East is to play 3NT. South leads the ♥7. North takes the ♥A and returns the ♥2.

Winners: ♠=3 ♥=1 ♦=3 ♣=1 Total = 8

You need one more winner and ♣s is your best suit. If the ♣K is in South's hand you can finesse it for 12 tricks. But if the ♣K is in North's hand you will lose that trick and at least 4 ♥s.

Before you put all your eggs in the ♣ finesse basket there is one thing you should do first.

You should test the ♦ suit by playing ♦Q, ♦K, ♦A. Both defenders follow three times and your ♦6 has become a winner, which you cash.

Now you have a problem. You have won 5 tricks so far and you have 4 more winners ready to take. So you can take your 9 tricks and run, or you can finesse the
