3NT by North

North is to play 3NT. East leads the ♥Q.

Winners: ♠=0 ♥=2 ♦=4 ♣=1 Total = 7

Needing two more winners you will have to make both the ♠K and ♠Q. This will only be possible if East holds the ♠A. Win the first trick (if you don't East might switch to ♣s) and play a small ♠ toward dummy's ♠Q. It holds the trick.

You should take your four ♦ winners now, being sure to end up in your hand. Then play another small ♠ toward dummy's ♠K. This also wins.

You have now won 7 tricks so don't mess around now. Take your two Aces and let them have the last four tricks.

If West held the ♠A you would not have made the contract.

A Simple Finesse has only a 50% success rate. That's why we only take finesses as a last resort.

other half they lose.

South is to play 3NT. West leads the ♦ 3.

Winners: ♠=1 ♥=5 ♦=1 ♣=1 Total = 8

You need just one more winner. Since West probably has 4 ♦s you will not be able to establish a trick in that suit, so your only hope is the ♠Q. You win the first ♦ so they don't get a chance to switch to ♣s, a suit you are worse off in. Then take your 5 ♥ tricks, ending in dummy.

You can't put it off any longer so play a small ♠ from dummy and put the ♠Q on. If it wins you will make your contract, if it loses you won't.

East held the ♠K so you were lucky this time.

But remember, finesses only work half the time. The

3NT by North

Welcome to the real world.

North is to play 3NT. East leads the ♥Q.

Winners: ♠=0 ♥=2 ♦=2 ♣=4 Total = 8

Needing one more winner you should see right away that it cannot come from ♥s, ♦s, or ♣s. That means you must hope that West has the ♠A. Win the first ♥, then play your 4 ♣ winners ending in dummy.

The moment of truth. You lead a small ♠ from dummy. West plays low and you play the ♠K.

Unfortunately East takes your ♠K with the ♠A. He then plays another ♥ and you at least make 8 tricks but have no hope for a ninth one so you go down 1.

You probably thought since these Deals were all about finesses that they would work all of the time.
