3NT by North

This is confirmed by East's lead of the ♥4, with a doubleton he would have led a higher card. So there is no need to hold up. But . . . it couldn't hurt, could it?

Yes, it could hurt real bad! Suppose West has nothing in his hand but the ♥ K Q J 10 8 7 6 that you already know about. When you let his ♥10 win the first trick he will realize that his hand is dead. And he may be smart enough, (or lucky enough), to switch to a ♠.

The purpose of the hold-up play is to cut communications between the two defenders. So the general guideline is to hold up until you are sure one of the defenders is void in the suit - maybe twice, maybe only once, and in this case not at all.

But one of the important considerations you have to think about is the possibility that the Defense will switch to another suit - where you might be in even more trouble.

You'd feel bad on this hand if you let West hold the ♥10 only to see him next lay down the ♠J.

North is to play 3NT. East leads the ♥4. West plays the ♥10.

Winners: ♠=1 ♥=1 ♦=3 ♣=1 Total = 6

You may not agree with North's 3NT bid but how else are you going to get to the only game that has a chance of making?

You need 3 extra winners and they will come from the ♣ suit even if East holds the ♣K and wins your finesse. You may think about holding up on the ♥A for one round just to make sure East has none if he wins the ♣K.

That would be a mistake. It is almost certain that West has a 7-card ♥ suit for his preemptive opening.

lead through dummy's ♥K. And the only card that South can get the lead with is the ♣Q.

Hold-ups are usually used in notrump hands, but here you use one to prevent the Danger Hand from gaining the lead. Let North have the ♣K. He cannot play a red card without helping you so he will surely play another ♣.

Pull trumps in two rounds. Then play the ♦10 and let it ride.

North will win this but he is helpless. Whatever he plays you will be able to discard a ♥ loser on dummy's ♦.

The purpose of the hold-up play is to cut communications between the two defenders. Here you knew you would lose exactly one ♣ trick so you chose to lose it to North, the Safe Hand.

If you had taken the first ♣ trick North would have won your later ♦ finesse, put his partner on lead with the ♣Q and then swallowed up your ♥K.

Of course if South had been clever enough to lead a ♥ originally this Deal wouldn't be here.

West's 2 ♣ cue-bid shows a limit-raise or better in ♠s. East is to play 4 ♠. South leads the ♣2. North plays the ♣K.

Losers: ♠=0 ♥=2 ♦=1 ♣=1 Total = 4

You have one loser too many. If South holds either the ♥A or the ♦K this will be an easy contract, but North opened the bidding so he probably has most of the high cards. It does look like South holds the ♣Q based on his low lead and North's play to trick one.

Having gone through that thought process what is your Plan?

You will need to discard a loser on dummy's fourth ♦, but you must do so without ever letting South gain the lead since South is the defender who can
