North is to play 6NT. East leads the ♠K.

You have 11 winners; 1 ♠, 2 ♥s, 4 ♦s and 4 ♣s. If you can make a trick with the ♠J all will be well. But if not, as long as East holds the ♠Q, which is almost a certainty, you will be able to squeeze him in ♠s and ♥s.

The first thing you should do is to duck the ♠K. If East foolishly plays another ♠ your troubles are over. But he doesn't, he plays the ♥Q instead which you win with dummy's ♥K.

Next play off your 4 ♦ winners, discarding a small ♥ from your hand.

Even though East didn't play a second ♠ your first round duck served a very important purpose - it rectified the count for your squeeze.

You are now zeroing in on East.

Play the ♣K, ♣J, then over to your ♣Q.

[showcards N:S7,S4,HA,H3 E:S9,S8,S6,C8 S:SA,SJ,H7,CA W:SQ,ST,HJ,H9]

Here is the layout after the 3 ♣ plays. Everybody followed suit except East who discarded a ♥ (unhappily, it seemed).

When you now play your ♣A, discarding a ♠ from dummy, East is squeezed.

If he discards the ♠10, then his ♠Q will fall underneath your ♠A, establishing your ♠J.

But if he instead throws the ♥9, both of dummy's ♥s will become winners.

♠s.			

North now holds the the only guard in ♠s.

Play the ♦ A, then ♦ K Q.

North will follow to all three ♦ s.

Now for the squeeze. Play dummy's ♦ J and discard your ♥ 10.

If North discards the ♠ J you will cash dummy's ♠ 6, then win the last 3 ♣ tricks.

So North will no doubt throw a ♣ instead. In which case you win the last 4 ♣ tricks.

Squeezes are so very satisfying.

East is to play 6NT. South leads the ♥ K.

As usual, you have 11 winners; 3 ♠s, 1 ♥, 4 ♦ s and 3 ♣s. If ♠s split 3-3 dummy's ♠ 6 will become trick #12. If ♠s don't split though, you will have the chance of a squeeze if the defender with long ♠s also has 4 or more ♣s.

For a squeeze to operate you will need to lose one trick and the time to do that is right now. Let South hold the ♥ K and win his ♥ continuation with your ♥ A.

North discarded a ♦ on the second ♥.

You might as well find out about the ♠s right now. Play the ♠ A K Q.

Too bad, South discards a ♥ on the third round of

Now play ♦ Q, ♦ J, ♦ 9. Discard the ♠ 5 from dummy on the third ♦.

[showcards N:SQ,HA,H8 E:SJ,S9,H9 S:HJ,H7,D7 W:SK,HQ,HT]

West could afford to throw 2 ♠ s and a ♥ on your ♦ plays.

But when you play the ♦ 7 he is squeezed.

He cannot dump his ♠ K because you would throw the ♥ 8 and dummy would be high.

So he will discard the ♥ 10 instead. At this point you know that the ♠ Q is worthless so you discard it. You win the final two tricks with the ♥ A and ♥ J.

South is to play 6 ♦. West leads the ♥ K.

You have 11 winners; 1 ♠, 1 ♥, 6 ♦ s and 3 ♣ s.

At first things look hopeless, but remember this is a lesson on squeeze plays. From the opening lead you know that West must hold the ♥ Q. If he also holds the ♠ K you will be able to squeeze him in ♥ s and ♠ s.

You let the ♥ K win, (hoping he will play another ♥), but he plays a small trump instead which you win in your hand.

Pull one more round of trumps, then unblock the ♠ A.

Then take your 3 ♣ winners, ending in your hand.
