North is to play 4♥. East leads the ♣J. West wins
♣ A K Q then switches to a trump.

West takes ♣ A K Q then switches to a trump.

You must win the next 10 tricks but you only have 9
winners.

West opened 1NT, showing 15-17 points, and East
has already produced 2 Jacks. So both the ♠Q and
♦K are with West and you will have to put the
squeeze on him.

You are in dummy, having won their trump exit with
the ♥K.

Since you need all the tricks the count is already

You plan to squeeze West by running the long ♥s in your hand, but the problem is that the ♦Q is not a
Threat card yet. To make it a Threat you need to unblock dummy's ♦A. So play the ♦A, then pull trumps
with the ♥A Q.

Unblocking the ♦A to make your ♦Q a squeeze Threat is called the Vienna Coup.

With 6 cards left to be played you are ready to apply pressure to West.

Play the ♥9 8, discarding ♦s from dummy. West is not troubled yet, he can discard the ♦J and the ♠3.

[showcards N:SA,SK,SJ,D6 E:SQ,ST,S9,DK S:S8,S7,H6,DQ W:S6,S5,D9,D8]

West is now looking a little nervous, like he has a big target on his back!

Play the ♥6 and throw dummy's ♦6.

West can choose his fate. If he throws the ♠9 you will know that his ♠Q will drop since his third card
MUST be the ♦K. So you would just play to the high ♠s and the ♠J would be good.

Or, he can throw his ♦K which makes your ♦Q a winner.

That worked great, right? Let's back up and pretend you had NOT unblocked the ♦A. We will just add one
♦ to everybody's hand and look at the ending.

Now when you play your ♥6 as a squeeze card you have a problem. You are squeezing dummy, not West.

If you discard the ♦6 West will throw his ♦J, then sit back and wait for his ♠Q trick.

But if you discard dummy's ♠J instead, West will match that by throwing his ♠9, then sit back and wait for
his ♦K trick.

Only by visualizing the ending and using the Vienna Coup can this hand be made.

6 ♣ by East

Unblocking the ♠A to create a Threat out of your ♠Q is the Vienna Coup.

As you see, North was able to find discards on your first three trump leads, but when you play the ♣7 and discard dummy's ♠2 he is squeezed.

He can see that if he discards a ♦ dummy will be high, so he will probably throw the ♠K in hopes that his partner holds the ♠Q. But you have that card and you make the slam.

As an afterthought to this Deal, let us suppose you were playing 6NT rather than 6♣.

The only difference would be that to rectify the count you would have to hold up once on the opening ♥K.

East is to play 6♣. South leads the ♥K.

You have 11 top tricks and hope for a 3-3 ♦ split to give you one more. If they don't split you can hope that the defender with 4 ♦s also holds the ♠K and that a squeeze will be possible.

In case the squeeze becomes necessary you should rectify the count, so you win the first trick, pull trumps in two rounds, then give up a ♥ trick.

South takes the ♥ trick and plays the ♦9 which you win with your ♦Q.

You now make the key play of taking dummy's ♠A before running three rounds of ♣s.

7NT by South

Play your 4♥ winner's next. West follows suit while East follows twice, then discards 2♦s.

Don't play ♠s yet!

Play your ♦A. East must give up.

If he throws the ♣J, you win. But if he throws a ♠ you also win. This is what is called a Win-Win bridge play.

North's 3NT rebid shows 6 ♠s headed by A K Q and nothing else. South is to play 7NT. West leads the ♦Q.

Nice hand. You have 12 high card tricks and either a 3-2 ♠ split or a 3-3 ♣ split will land this Grand Slam. But even if neither suit splits nicely you can STILL make it if the same defender holds 4 cards in both suits; in that case you will squeeze for the thirteenth trick.

Win the ♦K and (**IMPORTANT!**) test the ♣s first by playing ♣A K Q. Darn. West discards a ♦ on the ♣Q.

Alright, so East holds the ♣ Guard. You still need to exercise caution.
