3NT by North

Again don't hold up. Take the ♠ K and lead another small ♦, finessing with dummy's ♦ Q. Happily this time the finesse works, and even more happily both defenders follow suit. That means the rest of the ♦s are good and you make an overtrick.

This was just a normal suit-establishment Deal.

If looked different because of the two finesses you took.

North is to play 3NT. East leads the ♠ 4.

Winners: ♠=2 ♥=2 ♦=1 ♣=2 Total = 7

You need two more winners. They cannot possibly come from ♠s, ♥s, or ♣s since one defender must hold at least 4 cards in each of those suits. So your two extra winners must come from the ♦ suit.

There is no reason to hold up on the ♠ since the ♥ and ♣ suits also have just two stoppers. You win the ♠ A.

Your best play next is to finesse the ♦ 10. This may gain a trick by virtue of the finesse if East happens to hold the ♦ J, but primarily you are working to establish the ♦ suit. Assume West wins the ♦ J and returns a ♠.

3NT by East			

East is to play 3NT. South leads the ♠4. North puts on the ♠A and returns the ♠8.

Winners: ♠=2 ♥=1 ♦=2 ♣=1 Total = 6

Needing three more winners you are going to have to establish the ♣ suit. You are also going to have to be lucky!

You win the second ♠ and play your ♣Q. South covers with the ♣K. What do you do next?

You **DUCK**. If you take the ♣A now you will never get back to dummy to enjoy those other ♣s. So let South have the ♣K. You win his return, (probably a ♠), and play ♣J, then ♣9 to dummy's ♣A. As long as ♣s split 3-2 you will get the three winners you need.

You were prepared to lose that ♣ finesse to North so you could establish the suit in dummy.

South's play of the ♣K may have made you want to jump up with the ♣A, but you must stick to the original play of ducking one trick.
