3NT by North

North is to play 3NT. East leads the ♥5, West plays the ♥2.

Winners: ♠=2 ♥=2 ♦=1 ♣=2 Total = 7

You are very lucky. Apparently East led from ♥ K Q so you won an undeserved ♥ trick. Now, if ♣s split 2-2 you can make 12 tricks! But hold it a minute. If you play dummy's two top ♣s and they **DON'T** split 2-2 you will only win two ♣ tricks and the contract will fail. Instead you should play a small ♣ from dummy right now. The defenders will win the trick easily, but you will win their return and you will still have a ♣ to get to dummy's 6 ♣ winners!

Ducking a ♣ is the only way to make the contract and you might as well do it at the second trick.

home-free since dummy's 3 ♦ s are now established.

East is to play 3NT. South leads the ♠2, North plays the ♠J.

Winners: ♠=2 ♥=2 ♦=1 ♣=2 Total = 7

You need two more winners and dummy's ♦ suit is your only hope. **IF** ♦ s split 3-2 and **IF** the defenders don't take too many winners in their suit(s) you can establish ♦ s by ducking twice.

Win the first ♠. If you hold up they might pocket the ♠ trick and switch to another suit where you only have two stoppers.

Next play a small ♦ from each hand. Win the return (probably a ♠) and duck a second ♦.

If the defenders can only take 2 ♠ tricks now you are

You had to have the defender's ♠ s split 4-3. But in fact you were pretty sure they were going to do so. Since South's ♠2 was probably his fourth-down then he couldn't have a fifth-down.
