3NT by North

You were prepared to lose that ♣ finesse to West so you could establish the suit in dummy.

East's play of the ♣K may have made you want to jump up with the ♣A, but you must stick to the original play of ducking one trick.

North is to play 3NT. East leads the ♠4. West puts on the ♠A and returns the ♠8.

Winners: ♠=2 ♥=1 ♦=2 ♣=1 Total = 6

Needing three more winners you are going to have to establish the ♣ suit. You are also going to have to be lucky!

You win the second ♠ and play your ♣Q. East covers with the ♣K. What do you do next?

You **DUCK**. If you take the ♣A now you will never get back to dummy to enjoy those other ♣s. So let East have the ♣K. You win his return, (probably a ♠), and play ♣J, then ♣9 to dummy's ♣A. As long as ♣s split 3-2 you will get the three winners you need.

3NT by East			

East is to play 3NT. South leads the ♠2. North puts on the ♠J.

Winners: ♠=2 ♥=1 ♦=2 ♣=1 Total = 6

You need three more winners. It is possible your fourth ♦ can be established, but that needs a 3-3 split. It's also possible that the ♣ finesse will work, and also the ♥ finesse. Since you need the ♥ finesse anyway you should go ahead and try to establish the ♥s.

Win the first trick with your ♠Q and play a low ♥, ducking in dummy. North will no doubt win a cheap trick but no matter. When you next gain the lead play your other low ♥ and finesse the ♥Q. Assume this wins (if it doesn't you will be going down for sure). Play the ♥A and if both defenders follow your other 2 ♥s are good and your contract is made.

Ducking the first ♥ and finessing the second could let you wind up with no tricks at all in the ♥ suit.

But, it is your only chance to make the contract.
