[showcards W:CA N:C4]

You are West. The bidding has been as shown.
 Partner led the ♣A, dummy played the ♣4

Play the ♣8 to encourage a continuation. East will
 play the ♣Q on which you will play the ♣2.

East now knows you started with a doubleton, and
 more importantly, he also knows you want him to
 play a third ♣.

When he next plays the ♣K dummy will ruff, but
 whatever card he ruffs with you will have established
 a trump trick. When you later win your ♠K that will
 be down 1.

[showcards S:CQ]

You are South. The bidding has been as shown. You led the ♦5, North wins the ♦Q and returns the ♦7. East holds up his ♦A until the third round. He then plays the ♣Q

Play the ♣8.

You assume (hope) that North holds the ♣A. If he does then he will need help from you to decide which trick he should win. You play the ♣8 first, and the ♣2 next to show an even number.

If North is paying attention he will know to win the THIRD ♣. This will kill dummy's ♣ suit, and with it East's chance of making 9 tricks.
