 get it. North will discard his ♣K on South's extra ♦ winner.

[showcards W:SK N:S9]

You are West. The bidding has been as shown. Partner led the ♠A, dummy played the ♠2 and you signal with your ♠10. East next plays the ♠Q and you drop the ♠4, completing your doubleton signal. East then plays the ♠K and it turns out you don't have to ruff after all. So what are you going to play?

Play the ♣9.

This should be a clear enough signal for East to play a ♣ to your ♣A next.

An alternate play, just as good, would be for you to ruff the good ♠Q and play the ♣A yourself.

If you don't get your ♣ trick at trick 4 you will never

card you are asking South to switch to the higher suit (choosing between ♦s and ♥s).

South dutifully plays a ♥ and you take the next three tricks. Had he switched to a ♦ instead, East would have been able to discard one of his ♥ losers on West's ♦Q.

[showcards W:CK N:CJ]

You are North. The bidding has been as shown.

Partner led the ♣K, dummy's singleton was played

Play the ♣9.

South will look at your ♣9 and perhaps think for an instant that you want him to play another ♣.

But it will be a short instant because a look at dummy makes it absolutely clear to everybody that playing another ♣ could not help your side. Dummy has so many trumps that repeated ♣ leads would do nothing.

OK. If it's not an encouraging Attitude signal, what is it? Suit preference of course. Since it is a high spot
