[showcards N:C3]

You are West. The bidding has been as shown.

Partner led the ♥10, won by dummy's ♥A. At trick 2 North calls for dummy's ♣3. Which card do you play?

Play the ♣6.

You would not have been expecting North to play a small ♣ from dummy's holding. The only way it makes sense is if North holds the ♣Q.

If you play your ♣K you will win the trick, but in so doing you will set up 3 ♣ tricks for North, which is all he needs to make the slam.

Play low instead and North will win his ♣Q. But now your ♣K 10 sits behind dummy's ♣J 4 so he can get only one more trick in the suit, the ♣A.

harder for South. Sometimes he will guess correctly and play dummy's ♣K, but other times he will play dummy's ♣J, hoping you have the ♣Q.

[showcards S:C2]

You are West. The bidding has been as shown.

You lead the ♠J, the ♠K is played from dummy and holds the trick. Next come dummy's ♥K, then another trump to South's ♥A.

At trick 4 South plays the ♣2 from his hand and you must decide what to play.

Play the ♣3 (smoothly).

South has 2 small ♣s and faces a choice of dummy plays in the suit. He must decide whether to play you for the ♣A or the ♣Q. If you play your ♣A you make the decision very easy for him.

When you correctly play your small ♣ life becomes
