4♥ by North
you should try to find somewhere to put the ♠ loser.

You have 11 (perhaps 12) points and four trumps.
Just right for a limit raise.

So you bid 3♥ and partner goes to game.

South would play 4♥.

Click

North plays 4♥. East leads the ♠Q.

North plays 4♥. East leads the ♠Q.

Losers: ♠ 1 : ♥ 1 : ♦ 1 : ♣ 1 : Total = 4

You know you can't get rid of the ♦ loser, and it's hard to imagine a way that would let you get rid of the ♣ loser. The ♥ loser depends on the finesse. So

First you win the ♠A. You know that you will eventually take the ♥ finesse, so should you take it now? Visualize the likely defense actions if you do. Say West wins the ♥K. He will surely play another ♠, knocking out dummy's ♠K. Whenever you try to set up ♦s the defense will take their ♠ trick and you will eventually go down.

What happened is that you gave the defense a tempo and let them control the timing of the play. You should not have rushed into the ♥ finesse. Instead suppose that you win the first trick with dummy's ♠K and immediately play the ♦Q. The defense can take their ♦A when they want to and push another ♠, but now the timing is on your side. You can discard a ♠ from dummy on your good ♦ in time.

Take the ♥ finesse before you set up a ♦ trick and you will be just fine if the finesse wins. But if it loses you will lose a tempo and the defense will get to your ♠ loser before you can set up a ♦.

Set up the ♦ winner before you take the ♥ finesse and you will always be able to dump the ♠ loser no matter who has the ♥K.

3NT by South			

With 15 points and a balanced hand of course you open 1NT.

Partner's response is 2♣.

Partner's 2♣ bid is Stayman asking you to name a 4-card Major.

You bid 2♠, but that must not have been the Major he wanted so he bids 3NT.

South plays 3NT. West leads the ♦ 2. East plays ♦ Q. You hold up on this trick and East returns the ♦ 3.

South plays 3NT. West leads the ♦ 2. East plays ♦ Q. You hold up on this trick and East returns the ♦ 3.

Winners: ♠ 1 : ♥ 4 : ♦ 1 : ♣ 0 : Total = 6

You need to get three more winners and you have two very clear possibilities.

If East holds the ♠ K you can finesse him out of it and win an additional 3 tricks in the suit. The problem with this approach is that half the time West will hold the ♠ K and you will go down.

Or you can drive out the ♣ A and definitely set up an additional 3 tricks in that suit. The problem with this approach is that if the defender's ♦ s split 5-3 they will be able to win 4 ♦ s and the ♣ A.

If you pay attention to the opening lead this becomes a simple decision. West led the ♦ 2. Assuming that was fourth down then he must have led from a 4-card suit. So it looks like the ♦ s must be splitting 4-4 and it is safe for you to establish ♣ s. So you drive out the ♣ A. The defenders take their other 2 ♦ s but you make the game losing only 3 ♦ s and the ♣ A.

In this layout the ♠ finesse fails, as it would do half the time.

West's lead of the ♦ 2 should have made you pretty sure that he had led from a 4-card suit. If the ♦ 2 is fourth down, there cannot be a fifth down. Additionally, East's return of the ♦ 3 confirmed that conclusion. If East had started with only 3 ♦ s, (say ♦ Q 6 3) his correct return at trick 2 would have been his next highest, the ♦ 6. With 4 cards in the suit his correct return is his original fourth down.
