help you, so it is more logical to play West for the ♥K. But if West does have the ♥K it will do you no good to ruff East's ♠A, West will over-ruff and you would still have that ♣ loser.

So do it this way instead. Discard the ♣ loser on East's ♠A! Another ♠ from East won't hurt you since dummy would be able to over-ruff West. Whatever East plays you can win, then finesse West out of his ♥K.

It was said earlier that you didn't have a winner on which you could discard the ♣ loser.

That was true, so instead you were able to discard it on a loser!

You would really like to have a transfer bid in this situation, to make North bid ♥s.

But you don't have one, so you just bid 4♥ yourself.

South plays 4♥. West leads the ♠10. You play low in dummy and West holds the trick. He continues the suit and East takes the ♠Q and then plays the ♠A.

Loser List: ♠ = 2 : ♥ = 1 : ♦ = 0 : ♣ = 1 :: Total = 4

You've already lost the 2 ♠s. If West has the ♥K you might avoid a loser there. You don't have a winner on which to discard the ♣ loser.

If East has the ♥K it will have to be a singleton to help you, so it is more logical to play West for the ♥K. But if West does have the ♥K it will do you no good to ruff East's ♠A, West will over-ruff and you would still have that ♣ loser.

East holds only two small ♠s with his ♠K, then two entries will be enough. But what if East holds

♠ K x x x ? Can you find a third entry to dummy?

If the ♦s split 3-2 the answer is **YES**. Play the ♦A, then lead your ♦8 to dummy's ♦J. Watch carefully to see if both defenders follow to this trick. They do. Play a ♠ to your ♠10, which holds the trick. Play your ♦Q to dummy's ♦K. Finesse the ♠ again. Return to dummy by playing your ♦5 to dummy's ♦6, then finesse the ♠ one last time.

If the ♦s had split 4-1 you would not have been able to enter dummy three times. That would have been very unlucky.

If you played your ♦5 too early you would not have been able to enter dummy three times even when there was a 3-2 split. That would have been very unsmart.

With 20 HCP and balanced distribution you should open 2NT. Do not let the good 4-card ♠ suit sway you to anything else. Partner bids 3NT and everybody passes.

South plays 3NT. West leads the ♥J. You try the ♥Q, but East plays the ♥K.

Winner List: ♠ = 1 : ♥ = 0 : ♦ = 4 : ♣ = 1 :: Total = 6

You need 3 more winners and at least 2 of them must come from ♠s. Furthermore you don't want East to lead ♣s through your King. Your best hope is that East holds the ♠K so you can finesse.

So you win the ♥A and start thinking about dummy entries. Your obvious entries are the ♦K and ♦J. If
