4♠ by North

Loser List: ♠ = 0 : ♥ = 2 : ♦ = 1 : ♣ = 1 :: Total = 4

When you are 5-5 in the Majors you can transfer to either suit. Most will say transfer first to ♥s when you have invitational strength. So you bid 2♦.

Partner says 2♥;

When you are 5-5 in the Majors you can transfer to either suit. Most will say transfer first to ♥s when you have invitational strength. So you bid 2♦.

Partner says 2♥;

Now you show your other 5-card Major by bidding 2♠. This one hits the spot and partner raises to 4♠.

North plays 4♠. East leads the ♥5. West takes the ♥A and returns the ♥6 which East ruffs. East then plays the ♦2.

That's an odd way to show the second ♥ loser but you get the idea. You've lost 2 tricks already and it doesn't look like you can dodge the ♣A. Soooooo, you cannot afford to lose a ♦ trick.

Take dummy's ♦A and then play ♠A, ♠K, relaxing a little when both defenders follow suit both times.

Play your three high ♥s, discarding all three ♦s from dummy. Play your ♣ toward the ♣K. East will no doubt grab his ♣A but the rest will be yours, since you can ruff your ♦ loser in dummy.

It was a little unlucky to suffer that early ♥ ruff.

But it was very very lucky that the ruffer happened to be the defender with three trumps!

That meant you could pull trumps with two pulls, leaving that one important one in dummy.

3NT by East			

Partner's 3♦ bid shows a 5-card suit and is forcing to game. While 5♦ is possibly the best contract your double ♥ stopper should sway you to 3NT instead. This is the old "9 tricks are easier than 11" principle.

East plays 3NT. As expected, South attacks in his ♥ suit.

Winner List: ♠ = 2 : ♥ = 2 : ♦ = 0 : ♣ = 2 :: Total = 6

Even if North holds both black Queens, (not likely), you can only finesse your way to 8 tricks. Since you need 9 tricks you must establish the ♦ suit.

If South holds both the ♦ A and ♦ K then you are going down, because they will win the race to establish ♥s before you can establish ♦s.

But when the ♦ A and ♦ K are in different hands you have a good chance for success; it depends on North having no ♥ at the time he takes his ♦ winner.

So you should hold up on the first ♥ trick and win the second. If South started with 6 ♥s then North will be out. So whether he wins his ♦ trick first or second he still won't be able to continue ♥s.

After your hold up North has no ♥s. If he takes the first ♦ trick he will have to lead another suit. You will still have a ♥ stopper for when South wins **HIS** ♦ trick.

On the other hand, if South takes the first ♦ trick he can certainly drive out your last ♥ stopper. But then, when North takes **HIS** ♦ winner he will have no ♥.

Finally, if South had only a 5-card ♥ suit, good defense would beat you. But they have to be sure North wins the first ♦ trick, and they might slip up.

3NT by South

Winner List: ♠ = 1 : ♥ = 1 : ♦ = 3 : ♣ = 2 :: Total = 7

You need 2 more winners, and you need to get them before you lose the lead because it appears that West can cash 3 more ♠ tricks.

That means you need all 5 ♦ tricks. The good news is that the 5 missing ♦s will split 3-2 about two-thirds of the time. The bad news is that they will be 4-1 about one-third of the time. Can you protect yourself against a 4-1 break?

Maybe and maybe not. If West has ♦ J x x x there won't be anything you can do about it. But if East has this holding then you can succeed if you play your cards right.

Did you like that "play your cards right" quip? First play a ♦ to your ♦ K; both defenders follow. Next play a ♦ to dummy's ♦ Q. West discards a ♣. You are conveniently in dummy so you play dummy's last ♦ and East's ♦ J 9 are caught in a pincer movement by your ♦ A 10 5.

It was important to play the ♦s exactly as described because dummy had only one entry left, the ♦ Q.

Suppose your first ♦ play had been dummy's ♦ Q. You could make your contract if you play a small ♦ and finesse the ♦ 10. But at that point you wouldn't know whether the ♦s were splitting evenly or not. You'd be risking defeat on a hand where everybody who played for the 3-2 split was making the contract.

By taking the **SECOND** ♦ trick with dummy's ♦ Q the 4-1 split is exposed at the right time.

Partner's 2NT opening shows 20-21 points so you know you want to be in game. To find out which game you bid a Stayman 3♣. Partner replies 3♦.

Partner's 2NT opening shows 20-21 points so you know you want to be in game. To find out which game you bid a Stayman 3♣. Partner replies 3♦.

You don't have a 4-4 ♥ fit, so you bid 3NT.

The contract would be 3NT played by North.

South plays 3NT. West leads the ♠ 3. Your first problem is which ♠ to play from dummy. That is an easy problem. If you play the ♠ K you might lose the first five or six tricks. If you play low you guarantee a ♠ stopper. East plays the ♠ A and returns the ♠ 7 to dummy's ♠ K. West plays the ♠ 2 on this trick.
