2 ♠ by North

NORTH has a normal 1 ♠ opening bid, 14 points and five trumps.

SOUTH has good 4-card support and 7 points, so she raises to 2 ♠, passed by NORTH.

SOUTH does not consider showing the ♥s, first because she knows there is a ♠ fit, and second because she doesn't have the 11 points needed to bid a new suit at the 2-level.

With balanced distribution and 16 points SOUTH should open 1NT rather than 1♦.

NORTH's response is based on simple math. He adds his 18 points to the 15 minimum that SOUTH has announced and comes up with 33 points combined. This is enough for a small slam, and since he has balanced distribution he bids 6NT.

SOUTH is right at the maximum for a 1♠ opening bid - one more point and he would have opened 2♣.

NORTH does not have 3-card ♠ support but with 7 points must make some response. She cannot bid at the 2-level so she says 1NT (6-10 points).

SOUTH is fine with Notrump so he bids 3NT.
