7NT

North is to play 7NT. East leads the ♥K, dummy plays the ♥6 and West the ♥2.

With 12 obvious tricks your first thought should be that perhaps the ♠s will split 3-3.

Then, your second thought should be that dummy's ♥J is a Threat against East's ♥Q, so if it is East who holds 4 ♠s you will be able to squeeze him.

Since the contract is 7NT you take the first trick with the ♥A.

With one trick in the bag you should test ♦s next. When you play the ♦A West discards a ♠.

You continue with the ♦Q and ♦K, West discarding a ♥ and a ♣.

Since West has shown up with a ♦ void he has become the odds-on favorite to hold the ♠ Guard.

His ♠ discard makes it very likely that he started with 5 ♠s.

To find out for sure you play ♠A, then ♠Q. Sure enough East discards a ♥ on the second round.

You can't squeeze East in ♥s and ♠s because he doesn't hold the ♠ Guard, West does.

But now a completely new possibility shows up. Say to yourself, over and over, "East must guard ♥s, and West must guard ♠s. Nobody can guard ♣s."

You start playing dummy's ♦ winners.

With one more ♦ in dummy, things look like this.

West discards the ♣6.

When you play the ♦5 West must keep both ♠s to guard against your ♠7. So he discards the ♣6, hoping partner can stop that suit.

Your ♠7 is now worthless so you throw it.

East has no problem, (yet), he discards the ♥10.

It is now time to pressure East.

Play dummy's ♠5 to your ♠K.

East MUST keep his ♥Q so he releases his ♣5.

And you win the last three tricks with ♣K, ♣A, ♣8.

This is called a Double Squeeze.

7NT by East

Lead: ♠ Q

East is to play 7NT. South leads the ♠ Q.

One more winner is needed. Dummy's fourth ♣ is a possibility.

So take the ♠ K and play ♣ A K Q.

South discards a ♠ on the third ♣.

Now you know North guards the ♣s.

Before tackling ♦s, see what you can discover about ♠s.

Play the ♠ A. North discards a ♥.

North guards the ♣s. South guards the ♠s. Nobody can guard the ♥s.

Play 4 rounds of ♦s.

On the fourth ♦ North had to discard a ♥. You discarded a small ♠. South discarded a ♠ on the third ♦ and a ♥ on the fourth.

North discards a ♥.

You play dummy's ♦ 4. North cannot throw the ♣ J or he will set up dummy's ♣ 8, so he discards a ♥.

You discard the ♠ 7.

Now South is squeezed. He cannot discard the ♠ J or he will set up dummy's ♠ 9, so he discards a ♥.

You win the last three ♥ tricks with another Double Squeeze.

last trump.

Now play the ♦ A, ♦ K, and ♦ Q, discarding the ♣ 3 from your hand.

Then lead dummy's ♣ 7 to your ♣ K.

Here you are in your hand.

Only West can guard dummy's ♠ 10, and only West can guard dummy's ♣ 9.

West discards the ♣ 10, holding on to the ♠ J.

You play your ♥ A and West must give up one of his guards. If he holds on to the ♠ J then you toss dummy's useless ♠ 10. If he throws the ♠ J then you toss dummy's ♣ 9.

South is to play 6 ♥. West leads the ♠ A, then ♠ K.

When you looked at just your and dummy's cards on the previous page it may have looked impossible to find a twelfth winner.

Even looking at all four hands here it is still very difficult to come up with a plan.

Here's a hint: If West holds 3 ♣s, (and you see that he does), can you squeeze him in ♣s and ♠s?

Of course you ruffed the ♠ K.

The big problem with trying to squeeze West in the black suits right now is that East actually holds a ♠ guard. But you can fix that.

You draw two rounds of trumps with dummy's ♥ Q and ♥ 10.

East plays the ♠ Q and you ruff. Then you pull the

you.

At trick 2 you play a ♠.

Of course North will win this with his ♠K.

And he will no doubt continue with the ♠A and ♠9.

North continues with the ♠A and the ♠9; dummy discards two ♦s.

You discard 2 ♦s from dummy and a ♣ from your hand.

South cannot spare either a ♥ or a ♦ so he also throws a ♣.

Remember this position

North will almost surely cash his ♠2.

North cashes the ♠2; dummy discards a ♣ and South the ♣Q.

You and dummy both discard a ♣ and South also must discard a ♣.

It doesn't matter what North plays next, let's say it is a ♣.

You are in your hand with the ♣K.

You play the ♣A.

South is truly squeezed. If he discards a ♥, dummy's ♥5 will become a winner. but if he discards a ♦ then you will get a third ♦ trick and the contract.

Since it was North who started the squeeze by cashing his last ♠, this is called a Suicide Squeeze. **BUT**, what if North had not cashed that ♠?

West is to play 3NT. North leads the ♠3. South plays the ♠5.

From the opening lead of ♠3 and South's play of ♠5 you should have deduced that North held five ♠s to the A K. Therefore if you lose a trick in any other suit North will be able to take 4 ♠ tricks and defeat you.

You have 8 winners, and if South holds 4+ ♥s AND 3+ ♦s then only he can guard the two suits.

But how can you squeeze him?

Dummy's ♠10 won the first trick.

The answer to that question is that **YOU** cannot squeeze him.

But maybe you can make his partner do the job for

against West's ♦Q.

But, the ♠J is already a Threat card against East's ♠Q.

You play your ♣J.

Play your ♣J and ♣9, discarding the ♦8 and the ♥4 from dummy.

East can afford to discard the ♠9 and the ♥5.

West can spare his two ♠s.

You are there.

East gives up the ♥8.

Your ♣8 does it.

East cannot throw the ♠Q, so he gives up the ♥8. Dummy's ♠J is of no further value so you dump it.

West cannot throw the ♦Q, so he gives up the ♥2.

And you take the last three tricks with the ♥ suit. There were only two defenders; one of them had to guard ♠s and the other had to guard ♦s. There was nobody left to guard ♥s.

North is to play 7♣. East leads the ♠K.

At first glance this doesn't appear to be a difficult hand. You expect to win the opening lead, pull trumps, then establish a ♦ winner by playing ♦K, ♦A, and ruffing a ♦. As long as they split 3-2 you could reach dummy's ♦ winner with the ♥K.

So you take the ♠A, pull three rounds of trumps and play ♦K.

But when you lead to the ♦A East discards a small ♠.

Time to rethink. You are in dummy now, and you can ruff a ♦, return with the ♥K and ruff another ♦. The last ♦ would be good but you'd have no way to reach it.

Think squeeze instead.

You ruff a ♦. This turns the ♦J into a Threat card

either one is going to do the same thing. Assume South wins the ♦ 10.

He will then play the ♠ K, which you must ruff in your hand.

South discards.

A small ♦ to dummy's ♦ K.

You are in dummy, ready for the squeeze.

You play dummy's ♥ J.

North gets to choose his own fate - discarding a protector in one of the two suits. Of course, whichever suit he discards you will throw the opposite one.

Yet another slam, courtesy of the Squeeze Play!

East is to play 6 ♥. South leads the ♠ A.

If ♦ s and ♣ s split nicely this would be an easy slam. But with that wild ♠ bid by South you can't expect decent splits.

So you ruff the ♠, pull trumps in three rounds, then play ♣ A K and get the bad news when South discards a ♠.

You now know that North guards the ♣ s. And since South had 3 ♥ s and a very long ♠ suit it is pretty likely that North guards the ♦ s also. You will try to squeeze North in ♣ s and ♦ s, but first you must lose a trick to rectify the count.

South plays the ♦ 10.

So you play a low ♦ from each hand.

It doesn't matter which defender takes the ♦, since
