North opens 1♠. What should you bid? You have 11 points, enough to respond 2♣, (or 2♦), in standard bidding, but not when using 2/1. So you bid 1NT, showing 6-12 points. North rebids 2♣. Again, this doesn't promise more than 3♣ - it's just leaving room for us to describe our hand with our second bid. What do we bid now?

We know North doesn't have 4♥s, so we show our above-minimum hand by bidding 2NT. North has extra values and raises to 3NT. North is happy to play Notrump. He assumes we must have something useful in ♦s and bids 3NT. 3NT seems to be a good contract. There are 8 top tricks and possibilities for a ninth winner in either ♠s, ♦s, or, (the best chance), ♣s.

East opens 1♥. What should we bid? We respond 1NT, just as in standard bidding. The difference is that in this case the 1NT response is forcing on East. East rebids ♥s, promising at least a 6-card suit.

You have nothing to say over 2♥ except pass. Notice that this is the same bidding and same final contract that would have been reached with standard bidding. Using 2/1 is often like that.
