With any other lead declarer will make the contract.

The bidding has been as shown. The contract is 3NT

Lead the ♠ 4.

If partner had not doubled the contract you would probably have started with the ♥ 10, or possibly the ♣ 2.

But partner DID double, and most good players play that doubling 3NT is lead-directing as follows: If you have bid a suit, lead it. If doubler has bid a suit, lead it. If neither of you has bid, lead dummy's first bid suit.

So lead a ♠, certainly not a lead you would have made without the double. Partner immediately establishes 4 ♠ winners and he has the ♦ A for an entry.

The bidding has been as shown. The contract is 4♥

Lead the ♣8.

If partner had not doubled West's Stayman 2♣ bid you would probably have started with one of your Jacks.

But partner **DID** double, and the double of a conventional bid clearly means that the doubler would like you to lead that suit.

So lead a ♣, and partner will take three ♣ tricks. With any other lead declarer would quickly discard a ♣ from dummy on a high ♦, easily making the contract.

Declarer may still make the contract if he guesses the ♥Q correctly, but maybe not.
