4 ♠ by North

back toward his ♠ Q, playing West for the ♠ K. If he plays this way you will get two tricks and defeat the contract.

[showcards S:S4]

You are East. The bidding has been as shown.

You lead the ♥ J, covered by dummy's ♥ Q and won by West's ♥ K. West wins the ♥ A at the second trick and continues with a small ♥ ruffed by North.

North then plays the ♠ 4 from his hand. Do you play low? or play the ♠ J to force dummy's ♠ A?

Play the ♠ 3.

If North decides to finesse the ♠ 10 then you will still win the one ♠ trick which you are entitled to win.

However, with North holding the ♠ Q it would be very logical for him to go up with the ♠ A then lead

[showcards N:S4]

You are North. The bidding has been as shown.

Partner led the ♥9, taken by dummy's ♥10. The ♠4 is then played from dummy. Do you play low? or split your honors?

Play the ♠J (or ♠Q).

You should always make a point count check as soon as you see dummy. East's 2NT promises 20 or 21 points, West has 14 and you have 3; total = 37 or 38. Therefore South must have either 2 or 3 points. He cannot have two Jacks because you can see all four of them. Likewise he cannot have a Queen because you can see three of them and his ♥ lead (top of nothing) denied that Queen.

It follows that South **MUST** have a King, and it must be ♣s or ♦s since he has denied any ♥ Honor.

Since South will definitely win his King, you need to take one trick yourself, and the best way to do that is to split your Honors to establish one ♠ winner.

East has no defense to this, but if you had played low he would have played the ♠10 and made the slam.
