If his honor is not the ♥K then it won't matter whether you play ♥A or ♥Q to the first trick; you will win your two top cards and then play your small one back to East.

So assume North actually holds the ♥K x x. If you play the ♥A to trick one, then lead ♥Q, North will hold up on the second trick, and win the third ♥. Then, when you win your ♣K you will not have a ♥ to return to partner and declarer will make the contract.

So what happens if you play the ♥Q at trick one? North could still make the contract by holding up, **but he will be afraid to do so**. After all, from his perspective it looks like East probably holds the ♥A and he will be afraid of losing the first 5 ♥ tricks, perhaps even when the ♣K finessing is working!

[showcards W:H5 N:H8]

The bidding has been as shown. Partner led the ♥5, dummy played the ♥8

Play the ♥Q.

The Rule of Eleven tells you there are 6 cards in South, West and North that are higher than the ♥5. You can see 5 of them, so that leaves just one of them for North.

East cannot have all three of the outstanding honors, because from ♥K J 10 x x his correct lead would be the Jack. So you can deduce that North must hold exactly one of ♥K, ♥J, or ♥10.

The bidding has been as shown. Partner led the ♥ Q, dummy played the ♥ 6

Overtake with the ♥ K.

Your side needs to take 5 tricks to defeat this contract. Two of them will be ♥s, but it doesn't look like you can win any ♣s or ♠s.

That means you need to win 3 ♦ tricks and the only way that can happen is if you play ♦s from your side.

So win the first ♥ K (so partner will know you also have the ♥ A), and play the ♦ 10. Presumably East will play an honor, but South will take the trick and

will play an honor, but South will take the trick and

from your side of the table, and the way to make that happen is for you to ruff partner's ♠ K with an otherwise useless trump. You still get your two ♠ winners (sort of) but now you get to play a ♣ through South's ♣ K at trick 3.

[showcards W:SK N:SJ]

The bidding has been as shown. Partner led the ♠ A, then the ♠ K. Dummy follows suit and it is your play to the second trick.

Ruff partner's ♠ K.

It is obvious that your side can only get 2 ♠ tricks. And assuming that South has the Ace of trumps you will not make a single trick in the red suits. So you need to make 2 ♣ tricks.

If partner has the ♣ A K then he will take them, but if he has the ♣ A J he cannot win 2 ♣ tricks from his side.

To allow for this situation it will be better to play ♣s
