4♥ by North

You are wide open in ♠s, so you have to hope that East holds the ♦K. But that won't be enough by itself, in case he has ♦K x x x you also have to have three entries to your hand. Two of them will be the ♥A and ♥Q and the third entry must be the ♣A.

So you win the first trick with the ♣A and immediately take your first ♦finesse. It wins, so you return to your hand with a ♥ to the ♥Q and take another ♦finesse. Back to your hand with the ♥A (pulling the last trumps) and take a third ♦finesse. Finally on the ♦A you can discard either your ♣ loser or a ♠. You will have to give up three tricks at the end.

This plan would work 50% of the time, whenever East was dealt the ♦K.

Any other plan that was based on East holding the ♦K would work **ALMOST** 50% of the time but would fail when East had three protectors for the ♦K.

You open 1♥, partner responds 3♥.

What is your next bid?

Partner's 3♥ response shows 11-12 points with good trumps.

With your 14 points you decide to bid the game.

North plays 4♥. East leads the ♣4, West plays the ♣K.

North plays 4♥. East leads the ♣4, West plays the ♣K.

Losers: ♠ 3 : ♥ 0 : ♦ 2 : ♣ 1 : Total = 6

There is no hope of extra winners except the ♦ suit.

4♥ by East

you should try to find somewhere to put the ♠ loser.

You have 11 (perhaps 12) points and four trumps.
Just right for a limit raise.

So you bid 3♥ and partner goes to game.

West would play 4♥.

Click

East plays 4♥. South leads the ♠Q.

East plays 4♥. South leads the ♠Q.

Losers: ♠ 1 : ♥ 1 : ♦ 1 : ♣ 1 : Total = 4

You know you can't get rid of the ♦ loser, and it's
hard to imagine a way that would let you get rid of
the ♣ loser. The ♥ loser depends on the finesse. So

First you win the ♠A. You know that you will eventually take the ♥ finesse, so should you take it now?
Visualize the likely defense actions if you do. Say North wins the ♥K. He will surely play another ♠,
knocking out dummy's ♠K. Whenever you try to set up ♦s the defense will take their ♠ trick and you will
eventually go down.

What happened is that you gave the defense a tempo and let them control the timing of the play. You should
not have rushed into the ♥ finesse. Instead suppose that you win the first trick with dummy's ♠K and
immediately play the ♦Q. The defense can take their ♦A when they want to and push another ♠, but now
the timing is on your side. You can discard a ♠ from dummy on your good ♦ in time.

Take the ♥ finesse before you set up a ♦ trick and you will be just fine if the finesse wins. But if it loses you
will lose a tempo and the defense will get to your ♠ loser before you can set up a ♦.

Set up the ♦ winner before you take the ♥ finesse and you will always be able to dump the ♠ loser no
matter who has the ♥K.
