EW might win the ♣A and 4 ♥ tricks. Or, you can get them in ♠s if West holds the ♠K, a 50% chance.

You should try to avoid 50% chances when you have something better. Consider the chance that EW will actually be able to win 4 ♥ tricks if you give them the lead with the ♣A. In particular notice that you were dealt the ♥2! If East's ♥3 is a fourth down lead then he cannot have anything smaller and the ♥s are splitting 4-4.

Knowing they can only take 3 ♥ tricks makes it safe for you to drive out the ♣A.

So win the ♥A and drive out the ♣A. They will take their 2 ♥ tricks next. If West then leads a ♠ **DO NOT FINESSE**. Take your nine tricks and run.

The question to consider about this Deal is whether to trust your opponents, in particular whether you can trust them to be leading fourth highest.

While the answer may depend on the opponent, usually you should take their opening lead at face value. After all, their main goal is to give information to their partner, not to deceive you.

Partner has about 11 points and he has no 4-card Major suit.

He thinks 3NT would be a good spot. You have no reason to disagree so you pass.

North plays 3NT; East leads the ♥3.

West plays the ♥J and you duck, hoping he will switch to any other suit! But of course he doesn't; he continues with the ♥4.

Winner List: ♠ = 1 : ♥ = 1 : ♦ = 4 : ♣ = 0 :: Total = 6

You need three more winners. You can get them in ♣s by just driving out the ♣A. The danger is that

Who knows whether you should use a transfer or just bid 4♥ yourself. Assume you decide on the transfer and bid 2♦. Partner bids 2♥ (of course).

Who knows whether you should use a transfer or just bid 4♥ yourself. Assume you decide on the transfer and bid 2♦. Partner bids 2♥ (of course).

Naturally you go ahead and bid 4♥, the final contract.

The contract would be 4♥ played by West.

East plays 4♥. South leads the ♠Q and North follows with the ♠9.

You win the first trick with the ♠A.

Loser List: ♠ = 0 : ♥ = ? : ♦ = 2 : ♣ = 0 :: Total = ?

The loser count is very confused, but that ♣ suit is not confused at all. You want to be able to run the ♣s so your plan is to play the ♥ A K, and if both defenders follow go ahead and knock out the last ♥ so they can't ruff your ♣ tricks.

Unfortunately when you play ♥ A K, South plays the ♥Q, then discards a ♠.

You may think you should change your plan but you should go right ahead with it. North has two master trumps, but dummy still has 4 small ones. So play a ♥ to force out North's ♥10. He will no doubt play another ♠ and force dummy to ruff. No problem, knock out North's final ♥ and dummy will still have one tiny trump left. When you get back in you can run the ♣s unimpeded.

Usually it is good technique to leave master trump(s) undrawn.

The exception is when you have a long suit you wish to run and you can't stand to have the running stopped by a ruff.

This Deal is unusual in that there are two master trumps, but the principle is the same.
