North is to play 2♥ Doubled.

This is the only Deal like this out of the 100.

No Declarer Plan for you to make, no tricks to look for.

Just play through the deal as you think it might go and see how many tricks you can set North. Enjoy.

Sometimes the opponents make overcalls which disrupt the smooth flow of your side's bidding. You and your partner need to have ways of dealing with these disruptions. One possibility is the **lebensohl** convention which is used a few times in these 100 Deals. There are lots of other methods out there, and you may not care for lebensohl. One of the big reasons we use it is that it includes a penalty double - some other methods use the double for other reasons.

So, in lebensohl an immediate double of their overcall of partner's 1NT opener is for penalties. Just like this one - punish them if they dare try to disrupt your bidding!

The contract is 2♥ doubled, played by North.

6NT by East
fall doubleton.

Partner's 4NT bid is not Blackwood, it is the Quantitative 4NT. He is unsure whether to bid 6NT or not, so is inviting you to do so.

With 15 points you are supposed to pass. With 17 points you are supposed to bid 6NT. Wouldn't you know it, 16 points. Today you feel bold, so you say 6NT.

East plays 6NT. South leads the ♥J.

North plays the ♥A and returns the ♥3.

Winner List: ♠ = 4 : ♥ = 1 : ♦ = 2 : ♣ = 4 :: Total = 11

One trick is already lost and at first glance it looks like your only slim chance will be for the ♦ Q J to

But a dummy has a very important card, the ♥9. You know from the opening lead that South holds the ♥10, so if he happens to hold the only guard in ♦s you will be able to squeeze him in the red suits.

You don't even have to do anything special. Play your 4 ♣ winners, then 3 ♠ winners.

Now play the ♠J and watch South's discard. If he throws the ♥10 dummy's ♥9 will become a winner. If he doesn't throw the ♥10 then you know dummy's ♥9 is worthless so discard it and hope the ♦s are good.

Squeeze plays can be complex to figure out and difficult to execute.

But not always. Sometimes they just happen, like this one. You were really hoping for the ♦Q and ♦J to fall and you fell into the squeeze instead.
