SOUTH jumps to 4♠, confident that NORTH could make 10 tricks even if he just has 6 points.

NORTH knows he can make more and bids RKCB 4NT.

SOUTH's 5♦ response shows zero or three Keycards. So which is it? Zero or three?

SOUTH bid much too strongly to have no Aces. NORTH bids a confident 6♠, knowing SOUTH has either three Aces or two Aces plus the ♠K.

With eleven cards in the "round" suits EAST has a lot of playing strength. So when WEST bids a Limit Raise in ♥s EAST wants to know about Aces.

RKCBlackwood tells him that WEST has two Aces plus the trump Queen, so EAST can see that 6♥ is practically a certainty.
