NORTH has 17 points, counting 1 for the fifth Club.
She has a balanced distribution so she opens 1NT.

SOUTH is also balanced, so he does the math.

NORTH has either 15, 16 or 17, and with SOUTH's 18 the partnership total is either 33, 34 or 35. That is enough for a small slam, but below the 37 points needed for Grand Slam so he bids 6NT.

The partner who is first sure what the final contract should be should just go ahead and bid it. This is called "She who knows, goes."

In this deal, for example, it is WEST who knows. She has a balanced 14 points, so when EAST indicates 20/21 points with his opening 2NT bid she KNOWS the partnership holds about 34/35 points.

Therefore she GOES to 6NT.
