make the contract.

Just don't foul up on your ♠ entry.

North is to play 3NT. East leads the ♠ J.

Winners: ♠=3 ♥=1 ♦=0 ♣=1 Total = 5

You need 4 more winners, and they will come from the ♦ suit once you have knocked out the ♦ A. But there is one danger to avoid - if the defenders don't take the ♦ A on the first round dummy won't have a ♦ to lead back to your hand. So to make sure you have an entry back you win the first trick with dummy's ♠ K, saving your ♠ Q.

Next start playing ♦ s, first ♦ Q, then ♦ K. Assume the defenders take their ♦ A on the second round.

Win whatever they now play and come to your hand with the ♠ Q to enjoy your three established ♦ s for 9 tricks total.

Establishing the ♦ s is the straightforward way to

(pulling West's last trump), and discard a ♥ or ♣ loser on the ♦ 8.

You had to establish the ♦ s to make 10 tricks. And once again you had to pay close attention to entries.

You were counting on North to have a little better hand than that! South is to play 4 ♠. West leads the ♠ 6, East plays ♠ 4.

Losers: ♠=0 ♥=2 ♦=0 ♣=2 Total = 4

You must find a place for one of those losers and that will mean establishing the ♦ suit. If ♦ s split 3-3 that will be pretty easy so you should plan to deal with a 4-2 split. Dummy entries are limited so win the first trick in your hand with the ♠ A.

Before you pull any trumps you start on the ♦ s by playing ♦ A, ♦ K and then ruffing a ♦ with the ♠ K. West follows to the first two, then discards a ♥.

Play a small trump to dummy's ♠ 10 (East shows out) and ruff another ♦ with the ♠ J.

Dummy's last ♦ is now good. Play a ♠ to the ♠ Q,

3NT by North

Lead: ♦ J

South's ♣ bid was Stayman, but he didn't match ♠s. North is to play 3NT. East leads the ♦ J, West plays ♦ K.

Winners: ♠=2 ♥=1 ♦=2 ♣=3 Total = 8

With the ♦ K onside you have 8 tricks, and only need one more. If ♣s split 3-3 you can get 2 extras and make an overtrick. But when you are missing 6 cards they are more likely to be 4-2 than 3-3. Since you only need 4 ♣ tricks you should establish the suit with a duck.

Win the ♦ A and play a small ♣ from each hand.

The defense gets a cheap trick in ♣s but you don't mind because you still have a small ♣ for an entry to dummy. You win whatever they return and take the rest of your winners, including 4 tricks in ♣s!

If you had played the ♣s from the top you would have come up one trick short.

Lead: ♥5

South is to play 3NT. West leads the ♥5, East plays the ♥2.

Winners: ♠=2 ♥=2 ♦=1 ♣=2 Total = 7

You are very lucky. Apparently West led from ♥ K Q so you won an undeserved ♥ trick. Now, if ♣s split 2-2 you can make 12 tricks! But hold it a minute. If you play dummy's two top ♣s and they **DON'T** split 2-2 you will only win two ♣ tricks and the contract will fail. Instead you should play a small ♣ from dummy right now. The defenders will win the trick easily, but you will win their return and you will still have a ♣ to get to dummy's 6 ♣ winners!

Ducking a ♣ is the only way to make the contract and you might as well do it at the second trick.
