Lead: ♠ K			

You are East. The bidding has been as shown. You led the ♠ K, West played the ♠ 7 and North the ♠ 5.

What do you play to the second trick?

Play the ♦ 10, NOT another ♠.

You can see the ♠ 6, ♠ 5, ♠ 4, ♠ 3 and ♠ 2. So the ♠ 7 is West's lowest ♠, he is doing his best to discourage you from leading the suit again.

North held up with ♠ A J x, hoping you would play the suit again and give him two tricks.

If you play the ♦ 10 West will win the ♦ A and return a ♠, allowing you to drive out North's ♠ A while you still have the ♣ A for an entry.

falsecard to tempt you into playing the suit again. This isn't too likely, but if it happens just congratulate East for the fine play.

You are South. The bidding has been as shown. You led the ♠K, North played the ♠7 and East the ♠8.

What do you play to the second trick?

Play the ♠4.

You cannot see the ♠5. The most likely reason is that North has it, and his ♠7 is an encouraging signal. The only reason he would encourage you is if he held either the ♠A or ♠J.

Together, you two continue to play ♠s to drive out East's ♠A. When you get the lead with your ♣A you will cash your ♠ winners and North will still have the ♦A for some icing on the cake.

There IS another possibility if East is a better than average Declarer. North just might hold ♠9 7, giving East ♠A J 8 5. East played the ♠8 as a

Lead: ♣A

You are East. The bidding has been as shown.

Partner led the ♣A, dummy played the ♣4

Play the ♣8 to encourage a continuation. West will play the ♣Q on which you will play the ♣2.

West now knows you started with a doubleton, and more importantly, he also knows you want him to play a third ♣.

When he next plays the ♣K dummy will ruff, but whatever card he ruffs with you will have established a trump trick. When you later win your ♠K that will be down 1.

Lead: ♦5			

You are North. The bidding has been as shown. You led the ♦5, South wins the ♦Q and returns the ♦7. West holds up his ♦A until the third round. He then plays the ♣Q

Play the ♣8.

You assume (hope) that South holds the ♣A. If he does then he will need help from you to decide which trick he should win. You play the ♣8 first, and the ♣2 next to show an even number.

If South is paying attention he will know to win the THIRD ♣. This will kill dummy's ♣ suit, and with it West's chance of making 9 tricks.
