he started with three. A little bit of counting tells you that South started with the doubleton Jack, so you want to win the second ♦ trick.

This defense holds South to one ♦ tricks, if you had let him win the second one he would have had 9 tricks.

You are East. The bidding has been as shown.

Partner led the ♥Q, you played low and South won the ♥A.

South now plays the ♦J on which West plays the ♦2. What do you play now, and what is your plan.

Play the ♦3 and when South plays another ♦ win with your ♦A.

North hoped his ♦ suit would provide enough tricks to make the game. You can see that there is no entry to the North hand EXCEPT in ♦s, so you want to win your ♦A on the trick that South plays his last ♦. How can you tell which trick that is?

Only by watching what West plays. On the ♦J West played the ♦2, a low card signaling that he held an ODD number of ♦s. ODD must be either one or three so when he followed to the next ♦ you know

Lead: ♥ 4			

You are West. The bidding has been as shown. You led the ♥ 4, East plays the ♥ J, won by South with ♥ A.

South plays the ♠ J, you follow with ♠ 5, dummy ♠ 3 and East plays the ♠ 2. South continues with the ♠ 10

Play the ♠ 6.

East's ♠ 2 tells you he had an ODD number of ♠ s, obviously 3. Since South also must have 3, you must take your ♠ A on the third round, depriving dummy of the extra ♠ trick.

South may now turn to the ♦ suit, but your side can win the first ♦ and drive out South's ♥ K. You will win 2 ♥ s, 2 ♦ s and the ♠ A, down 1

Lead: ♥5			

You are East. The bidding has been as shown.

Partner led the ♥5, dummy played the ♥10

Play the ♦3 (or the ♠2).

You really want West to lead a ♣ if he gets into the lead. If you discard the ♣9 West will surely get the message and will lead a ♣. BUT - you will only win 3 ♣ tricks. The ♣9 would have been the fourth winner.

So instead, play a low card in one of the other suits, say the ♦3.

South is one trick short and he sees he can easily get that trick in ♥s. So he plays a second ♥ from dummy and you now discard the ♠2. West takes the ♥A and he can see that you don't want him to lead a ♠ or a ♦. He deduces that you might like a ♣ so he plays his ♣2 and you win 4 tricks.

You are West. The bidding has been as shown. You led the ♥4, East takes the ♥A and returns the ♥3. You ruff and then play what???

Play a low ♣.

Partner played the ♥3, a low card, for you to ruff. That means his re-entry, if he has one, is in the lower-ranking suit.

Partner takes the ♣A and gives you a second ♥ ruff.

Lead: ♦ A			

You are East. The bidding has been as shown.

Partner led the ♦ A, dummy played the ♦ 3

Play the ♦ 2.

You know partner also has the ♦ K, and normally you would give an encouraging signal when you hold the Queen. But with this hand you want partner to switch to ♣s as soon as possible. So you play a low ♦.

West looks at your signal, then looks at dummy, then looks at your signal. He knows you want a switch and it looks like a switch to ♣s might work the best. South plays a low ♣ from dummy, you win the ♣J. Next you play a low ♦, taken by West with his ♦K. West leads a ♣. Dummy plays the ♣K, you win that, cash another ♣, then cash your ♦Q. That first signal led to your side winning the first 6 tricks. Wow.

Lead: ♥ A			

You are West. The bidding has been as shown. You led the ♥ A, East puts on the ♥ Q. It's your play.

Play the ♥ 2.

East's ♥ Q is either a singleton, (practically impossible), or a signal showing that he also holds the ♥ J. In either case you can reach the East hand on the second trick by playing a low ♥. Since you don't particularly want to start playing ♦ s from your side, you go ahead and play a small ♥, won by East with the ♥ J.

East next plays the ♦ Q and however South tries it your side will take the next two ♦ tricks and set the contract.
