Lead: ♥10

You are West. The bidding has been as shown.

Partner led the ♥10, won by dummy's ♥A. At trick 2 North calls for dummy's ♣3.

Play the ♣6.

You would not have been expecting North to play a small ♣ from dummy's holding. The only way it makes sense is if North holds the ♣Q.

If you play your ♣K you will win the trick, but in so doing you will set up 3 ♣ tricks for North, which is all he needs to make the slam.

Play low instead and North will win his ♣Q. But now your ♣ K 10 sits behind dummy's ♣ J 4 so he can get only one more trick in the suit, the ♣A.

Lead: ♠ J			

You are West. The bidding has been as shown.

You lead the ♠ J, the ♠ K is played from dummy and holds the trick. Next come dummy's ♥ K, then another trump to South's ♥ A.

At trick 4 South plays the ♣ 2 from his hand and you must decide what to play.

Play the ♣ 3 (smoothly).

South has 2 small ♣ s and faces a choice of dummy plays in the suit. He must decide whether to play you for the ♣ A or the ♣ Q. If you play your ♣ A you make the decision very easy for him.

When you correctly play your small ♣ life becomes harder for South. Sometimes he will guess correctly and play dummy's ♣ K, but other times he will play dummy's ♣ J, hoping you have the ♣ Q.

Lead: ♠6			

You are West. The bidding has been as shown.

Partner led the ♠6. You won the ♠A and returned the ♠9, won by North's ♠Q.

North next played to dummy's ♣A and led the ♦2. What do you play?

Play the ♦A.

Count the points. North's 15-17 plus South's 11 plus your 10 comes to 36-38. So East has room for an Ace or a King, but no more.

East's second ♠ play was the 2, so it looks like he started with 5 ♠s. And the fall of North's ♠s looks like he may have 1 ♠ left, very likely the ♠K.

All this means that you should take your ♦A now and return your last ♠ to establish East's suit. Now East's ♦K will be an entry to the ♠s

If you play low, East will have to take the ♦K now, and although he can play a ♠ to establish the suit, he will not have an entry to be able to cash them.

will). Dummy's ♥K will take the trick, and when another ♥ is played you will have to win it with your now bare ♥A. You will then have to play a ♦ or a ♣, giving South a ruff and sluff.

But if you take your ♥A now, then exit with your ♥2, South can win the ♥K but will still have to lose a ♥ to East.

You are West. The bidding has been as shown.

You lead the ♣Q, East plays low and South wins the ♣A.

South pulls trumps in 2 rounds. He then takes the ♦K, ♦Q, ♦A, discarding a ♥ on the last one. Next he plays dummy's last ♣ to his ♣K.

Having done all this, South now plays a low ♥ from his hand. What do you play?

Play the ♥A.

If you followed what South was doing you will realize that he has eliminated both the ♦s and ♣s from both his hand and dummy. If it isn't clear that he is now out of ♣s, just remember the bidding - he must have had 5 ♠s and 4 ♥s.

Suppose you play low on this ♥ (as South hopes you
