would then get the lead and pull your two remaining trumps. That would leave one trump in dummy to ruff his ♠ J, his only remaining loser.

You are West. The bidding has been as shown.

Partner led the ♦ Q, you signaled with the ♦ 8 and North won the ♦ A.

North then played low to dummy's ♠ K, and led dummy's ♠ 6. Your decision is not whether to play high or low, but whether to ruff or not, which amounts to the same thing.

Do not ruff.

Even though North holds the ♠ A, if you ruff now he will just put on a small ♠ and you will be ruffing a loser. Instead discard a ♦.

North will win the ♠ A, but will not be able to ruff any ♠ losers in dummy because your trumps can overruff any of South's trumps.

Suppose you had ruffed the ♠. North would have played his ♠ 9, leaving himself with ♠ A J. He

Lead: ♣K			

You are West. The bidding has been as shown.

You lead the ♣K and continue with the ♣J then ♣Q, taken by South's ♣A. To trick 4 South plays the ♥4. What do you play?

Play the ♥Q.

To see why you should play the ♥Q, just visualize the result if you play low. South will finesse with dummy's ♥8. If East wins his ♥J on this trick there will be 4 good ♥ tricks in dummy. If East withholds his ♥J then Declarer will have 3 ♥ winners.

Now visualize the result of playing the ♥Q. Whether South takes this trick or not he cannot win more than 2 ♥s.

Lead: ♥10

You are West. The bidding has been as shown.

Partner led the ♥10, won by dummy's ♥A. At trick 2 North calls for dummy's ♣3.

Play the ♣6.

You would not have been expecting North to play a small ♣ from dummy's holding. The only way it makes sense is if North holds the ♣Q.

If you play your ♣K you will win the trick, but in so doing you will set up 3 ♣ tricks for North, which is all he needs to make the slam.

Play low instead and North will win his ♣Q. But now your ♣ K 10 sits behind dummy's ♣ J 4 so he can get only one more trick in the suit, the ♣A.

Lead: ♠J

You are West. The bidding has been as shown.

You lead the ♠J, the ♠K is played from dummy and holds the trick. Next come dummy's ♥K, then another trump to South's ♥A.

At trick 4 South plays the ♣2 from his hand and you must decide what to play.

Play the ♣3 (smoothly).

South has 2 small ♣s and faces a choice of dummy plays in the suit. He must decide whether to play you for the ♣A or the ♣Q. If you play your ♣A you make the decision very easy for him.

When you correctly play your small ♣ life becomes harder for South. Sometimes he will guess correctly and play dummy's ♣K, but other times he will play dummy's ♣J, hoping you have the ♣Q.

Lead: ♠6			

You are West. The bidding has been as shown.

Partner led the ♠6. You won the ♠A and returned the ♠9, won by North's ♠Q.

North next played to dummy's ♣A and led the ♦2. What do you play?

Play the ♦A.

Count the points. North's 15-17 plus South's 11 plus your 10 comes to 36-38. So East has room for an Ace or a King, but no more.

East's second ♠ play was the 2, so it looks like he started with 5 ♠s. And the fall of North's ♠s looks like he may have 1 ♠ left, very likely the ♠K.

All this means that you should take your ♦A now and return your last ♠ to establish East's suit. Now East's ♦K will be an entry to the ♠s

If you play low, East will have to take the ♦K now, and although he can play a ♠ to establish the suit, he will not have an entry to be able to cash them.
