4 ♠ by North			
Lead: ♥ 8			

The bidding has been as shown. South's 2♥ bid shows good ♠ support with at least 10 points.

Partner led the ♥8, dummy played the ♥6

Play a small ♥.

Partner's ♥8 lead is a high spot card, either top-of-nothing, or a singleton or doubleton. He definitely does not have an honor, which means that North holds ♥ A Q J.

In other words, your ♥K is dead in the water. BUT, if you play it to this trick you hand North three ♥ tricks, while if you play a low ♥ he can only get 2 winners in the suit.

The extra winner would permit North to discard 2 of dummy's ♦ losers, and this would give North the contract.

Lead: ♥Q

The bidding has been as shown. Partner led the ♥Q, dummy played the ♥4

Play the ♥K.

Admittedly you have a terrible hand. But that's no reason to be careless. **YOU** can beat this contract, but you have to do it right now by unblocking the ♥K. If declarer holds up you will continue with your ♥7 and partner will establish his suit while he still has the ♣A for an entry. If declarer doesn't hold up it will be just as bad for him.

But suppose you say "Well, partner's ♥Q is just as good as my ♥K so I'll just save the King for later" as you play low. Declarer will love you. He will hold up on the ♥Q, then again on trick two when you play the ♥K. AND HE WILL STILL HAVE HIS ♥A when you switch to another suit. He will have time to drive out the ♣A while he still has ♥s stopped.

It was a good thing you held the ♥K rather than declarer, but it is a nuisance that you must get out of the way on the very first trick.

Lead: ♥2			

The bidding has been as shown. Partner led the ♥2, dummy played the ♥A

Play the ♥Q (or ♥K).

You know partner has a 4-card ♥ suit, (he led the deuce), and you know it is headed by an honor. You hope the honor is the ♥J, but in any case you must get your high ♥s out of the way.

Declarer will probably come to his hand and then take a ♠ finesse. You win the ♠K, take your other high ♥, then lead your ♥3 toward your partner.

As you see, partner did hold the ♥J 9, so your side wins 3 ♥ tricks.

If declarer played low on the first trick you would win the ♥Q, then play the ♥K to dummy's ♥A.

able to cash his last ♠.

Note that if dummy's ♠ 9 was played you would cover with your ♠ J, leading to the same situation.

The bidding has been as shown. Partner led the ♠ 5, dummy played the ♠ 2

Play the ♠ 7.

Partner's low ♠ lead tells you he has an honor in the suit, so it must be either the ♠ Q or the ♠ 10. West's jump to 2NT makes it almost certain that he holds the ♠ Q, so you can figure partner probably led from ♠ 10 x x 5.

Apply the Rule of 11. 11 minus 5 = 6 cards higher than the ♠ 5 held by dummy, you, and declarer. Since you can see 5 of the 6 you conclude that that declarer will have to play his ♠ Q to beat your ♠ 7.

West will take the ♠ Q at trick 1, but when North wins a high ♥ he will play another ♠ through dummy's ♠ K 9 to your ♠ A J. Once you clear dummy's ♠ away partner will win another ♥ and be

Lead: ♥5

The bidding has been as shown. Partner led the ♥5, dummy played the ♥8

Play the ♥Q.

The Rule of Eleven tells you there are 6 cards in South, West and North that are higher than the ♥5. You can see 5 of them, so that leaves just one of them for North.

East cannot have all three of the outstanding honors, because from ♥K J 10 x x his correct lead would be the Jack. So you can deduce that North must hold exactly one of ♥K, ♥J, or ♥10.

If his honor is not the ♥K then it won't matter whether you play ♥A or ♥Q to the first trick; you will win your two top cards and then play your small one back to East.

So assume North actually holds the ♥K x x. If you play the ♥A to trick one, then lead ♥Q, North will hold up on the second trick, and win the third ♥. Then, when you win your ♣K you will not have a ♥ to return to partner and declarer will make the contract.

So what happens if you play the ♥Q at trick one? North could still make the contract by holding up, **but he will be afraid to do so**. After all, from his perspective it looks like East probably holds the ♥A and he will be afraid of losing the first 5 ♥ tricks, perhaps even when the ♣K finessing is working!
