Lead: ♥ Q

The bidding has been as shown. Partner led the ♥ Q, dummy played the ♥ 6

Overtake with the ♥ K.

Your side needs to take 5 tricks to defeat this contract. Two of them will be ♥ s, but it doesn't look like you can win any ♣ s or ♠ s.

That means you need to win 3 ♦ tricks and the only way that can happen is if you play ♦ s from your side.

So win the first ♥ K (so partner will know you also have the ♥ A), and play the ♦ 10. Presumably North will play an honor, but East will take the trick and put you back on lead with your ♥ A. You play the ♦ 9 and your side will collect 3 ♦ tricks to go with your 2 ♥ s.

through East's ♣K at trick 3.

The bidding has been as shown. Partner led the ♠A, then the ♠K. Dummy follows suit and it is your play to the second trick.

Ruff partner's ♠K.

It is obvious that your side can only get 2 ♠ tricks. And assuming that East has the Ace of trumps you will not make a single trick in the red suits. So you need to make 2 ♣ tricks.

If partner has the ♣ A K then he will take them, but if he has the ♣ A J he cannot win 2 ♣ tricks from his side.

To allow for this situation it will be better to play ♣s from your side of the table, and the way to make that happen is for you to ruff partner's ♠K with an otherwise useless trump. You still get your two ♠ winners (sort of) but now you get to play a ♣

to your four winners.

The bidding has been as shown. Partner led the ♥8, dummy played the ♥J

Play the ♥9. South played dummy's ♥J to tempt you to cover. Don't fall for it.

Partner's lead of a high spot card shows no honors in the suit. That added to the fact that South bid Notrump after you had mentioned ♥s is pretty good evidence that South holds at least ♥ Q x x.

To maintain communication with partner your best hope is to duck the first ♥, but to signal encouragement with the ♥9.

South wins the first trick easily, but must try to establish ♣s. He will enter dummy with the ♠A, then try to run the ♣Q.

Not today. Partner takes the ♣K and returns his ♥2

Lead: ♣9			

The bidding has been as shown. Partner led the ♣9, dummy played the ♣10

Play the ♣6.

Partner's ♣9 is likely from a short suit. If it is a singleton, you should take the ♣A immediately and return the suit for a ruff. If it is a doubleton, you should NOT take your ♣A now, but should hope partner can get the lead and play his second ♣ to your Ace so you can give him the ruff.

You can figure out which it is.

If it is a singleton, then West must hold 5 ♣s. But you know West has 4 ♠s, so if he also has 5 ♣s then he only has 4 red cards, and he would not have opened 1NT with either 5-4-2-2 or 5-4-3-1 distribution.

So partner's ♣9 is not a singleton, and you should wait. Declarer then runs dummy's ♠Q. Partner wins the ♠K, returns his OTHER ♣ to your ♣A, and NOW you give him the ruff. He takes the ♦A for down 1.

Play the ♥6.

Declarer gets two ♥ winners whether you play one of your honors on this trick or not. So why does it matter what you do?

Suppose you cover with your ♥Q. North will win his ♥A, then play ♣s until your ♣A is forced out on the third round. He can then force an entry to dummy in the ♥ suit to reach the two ♣ winners.

Now suppose you duck the ♥J. Again North will push ♣s, and again you hold up until the third round. Ahh, what a difference. Now declarer cannot use the ♥s to enter dummy and he will never get to enjoy those two ♣ winners.
