North would play 4♠.

South plays 4♠. West leads the ♦ 2. East plays ♦ J.

South plays 4♠. West leads the ♦ 2. East plays ♦ J.

Losers: ♠ 1 : ♥ 0 : ♦ 2 : ♣ 2 : Total = 5

Counting losers from the South hand you have 2 ♣ losers to get rid of. If you had counted from the North hand there would have been 2 ♥ losers to get rid of. In any case the plan is the same.

Win the ♦ A and play ♠ A and ♠ K. If the ♠ s split 3-2 you are home-free. Leave the master trump out and play your ♣ A K and dummy's ♥ A K. Then cross-ruff ♣ s and ♥ s. Whichever defender holds the last trump is welcome to ruff with it at any time. The defense is also welcome to take their 2 ♦ s at any time. Your 10 tricks are safe.

This is another example of the general principle to leave a master trump out.

North and South were able to make all their small trumps individually.

If East ruffs the fourth ♥ with his master ♠ Q South just discards a ♦ loser and makes an overtrick.

There is an excellent bidding guideline which tells you how to respond with two 4-card Majors. You bid them "up-the-line". That means you bid 1♥.

Partner's rebid is 1♠.

This hand shows why responder should bid "up-the-line". Partner can now show a 4-card ♠ suit at the 1-level. Imagine the suits reversed - you first respond with 1♠. If partner wanted to show a ♥ suit he would have to go to the 2-level, and he might not have the strength to do so.

Back to the actual situation. Over partner's 1♠ bid you jump to 3♠. This jump shows about 11-12 points and good ♠ support (4 cards). In case you thought this showed 13 or more points that wouldn't be logical. If you had 13 points and 4 ♠ s you would jump all the way to game. So 3♠ is invitational. Partner accepts the invitation.

and then a small one you'll be sorry. Those extra three ♣s will be established as winners but you will have no entry to them.

Instead, you play your ♣4 to the second trick and also play a low card from dummy. This is called Ducking the trick. East/West will certainly win that trick, but you are in control. You can win whatever suit they play and you still have that ♣7 to reach dummy's solid ♣s.

You can see that with ♣s splitting 3-2 the Duck insures the contract.

But just imagine you had played ♣A, ♣K, ♣2. At that point ♣ 9 6 5 would all be winners, but don't think East is going to let you reach dummy with either of those two Jacks!

You have 15 points and you have a balanced distribution. You should open 1NT. It is true that you do not have ♣s stopped, but you are not required to have a stopper in all the suits to open 1NT. Partner jumps to 3NT and you pass.

South plays 3NT. West leads the ♥Q.

South plays 3NT. West leads the ♥Q.

Winner count: ♠ 1 : ♥ 2 : ♦ 1 : ♣ 2 : Total = 6

In many Notrump hands it is good to hold up to disrupt the defender's communications. In this hand you have a double-stopper in ♥s but only a single stop in ♠s and ♦s so win the first trick.

You need 3 more tricks from the ♣ suit. As long as the ♣s split 3-2, which is very likely, you can set up the tricks you need. **BUT**, if you just play ♣A ♣K

Is there any doubt? Although you only have 11 HCP your 6-card suit adds 2 more. And with 13 points you should always open. So you open 1 ♣.

Partner responds 3 ♣.

With the ♣ fit your hand is now revalued to 15 points. But it's still a close thing. You may be able to make 5 ♣ or you may not.

Passing would not be horrible - but when in doubt it is usually better to be bold. You cross your fingers and bid 5 ♣.

South plays 5 ♣. West leads the ♦ Q.

South plays 5 ♣. West leads the ♦ Q.

Losers: ♠ 1 : ♥ 0 : ♦ 1 : ♣ 1 : Total = 3

The two black Aces aren't going away so if you are to make this contract you must do something about your ♦ loser. And the only likely place to put it is on dummy's ♠K. If West has the ♠A, you can lead up to the ♠K and make a winner out of it.

Suppose you win the ♦ Q in dummy and play a ♣. Somebody will win the ♣A and play another ♦. You win this and lead toward the ♠K. No good. West jumps up with his ♠A and sets you with a ♦ winner.

The problem was that when you played a trump you let the timing go to the defense. They could knock out your last ♦ stopper while they still had the ♠A. Try it this way.

Win the ♦ in your hand and immediately play the ♠9. If West doesn't take his ♠A he'll never get it, so assume he goes up. Now he leads ♦J but you win, get to dummy with the ♥K and play the ♠K, discarding the ♦ loser.

Pulling trumps is very important, but sometimes there is something you must do **BEFORE** you play trumps.

In this hand that something is to establish the ♠K so you can discard your ♦ loser.

5♥ by South

Lead: ♠ 10

You have a very good hand. But not good enough to open 2♣, so you open 1♥.

Partner jumps to 3♥.

This is close. Partner has 11 or 12 points and good ♥ support. Your hand revalues to 21 points. You might have a slam. You decide to try for it and bid 4NT. Partner replies 5♣ showing no Aces. So much for the slam. You bid 5♥.

South plays 5♥. West leads the ♠ 10. You put on dummy's ♠ J, East plays the ♠ K and you win the ♠ A.

South plays 5♥. West leads the ♠ T. You put on dummy's ♠ J, East plays the ♠ K and you win the ♠ A.

Losers: ♠ 1 : ♥ 1 : ♦ 0 : ♣ 1 : Total = 3

You cannot avoid losing either of the two Aces. So therefore you must do something about the ♠ loser. And the only thing you can do with it is to discard it on one of dummy's ♣s.

Be careful. If you lead a trump now a defender will take the Ace and play another ♠, exposing your loser while the ♣A is still out. You must set up the ♣ first. So at trick 2 play your ♣ to dummy's ♣Q. A defender may win this and play a ♠, but you win the ♠ Q and play the ♣K, discarding your ♠ loser. Now you switch to trumps.

The way you decide whether to start pulling trumps right away is to use your imagination.

Imagine what the defense will do if you lead a round of trumps. Then imagine what they will do if you play a different suit instead.

West holds the ♠ K. But this can't succeed. If West does hold the ♠ K he will cover, either this trick or the ♠ J, and someone's ♠ 10 will become a winner. Of course if East has the ♠ K then the finesse will fail, along with your chance of 2 more winners.

The correct way to play for 2 more tricks is to hope **EAST** has the ♠ K and lead twice toward your ♠ Q J. So win the first trick, play ♠ 4 to dummy's ♠ A. Lead the ♠ 3 toward your hand, playing the ♠ J if East plays low. (Of course if East ever plays the ♠ K he gives you two winners immediately.) When the ♠ J wins, return to dummy with the ♦ A and lead the ♠ 6 toward your ♠ Q.

When East holds the ♠ K you can always get 3 ♠ tricks if you play correctly.

With 19 points you are too strong to open 1NT so you open 1 ♦. Partner responds 2 ♦.

Perhaps you can make 5 ♦. But 9 tricks are easier than 11 so you bid 3NT. Notice that there was no reason to "show" your ♠ suit. If partner held 4 ♠s he would not have bid 2 ♦.

South plays 3NT. West leads the ♥ Q.

South plays 3NT. West leads the ♥ Q.

Winners: ♠ 1 : ♥ 2 : ♦ 1 : ♣ 3 : Total = 7

You can create one winner in ♦s if they split 3-2, but too late, the defense would have set up their ♥s. So you must get 2 more ♠ tricks.

This is one of the most misplayed positions in bridge. The usual approach is to lead the ♠ Q, hoping that

♠. If East plays the other high honor you play low. If East plays low you guess whether to play the ♠K, or ♠10. Your best play is to assume the two honors were split and play the ♠Q.

Leading twice toward the ♠ Q J gives you a guarantee on this layout because East held a doubleton high honor.

Now

Here West has taken your ♠J with the ♠A. When you again lead a small ♠ from dummy say that East plays the ♠5.

You might think that West is just as likely to have held an original doubleton ♠ A K as doubleton ♠ A 10, and that playing the ♠9 would be as good a play as ♠Q.

This is untrue for a very classy-named reason - **The Principle of Restricted Choice**. You may not even believe it when you read it, but it's mathematically sound. If West were dealt an original ♠ A K, he would have been just as likely to win with the ♠K as with the ♠A. The fact that he actually won the ♠A makes it less likely that he also holds the ♠K.

HE WHO KNOWS, GOES You **KNOW** your side has 26-28 points. You **KNOW** your side has 8 or more ♠s. You **GO** to 4♠.

South plays 4♠. West leads the ♦ J.

South plays 4♠. West leads the ♦ J.

Losers: ♠ 2/3 : ♥ 0 : ♦ 1 : ♣ 0 : Total = 3/4

You are definitely going to lose the ♦ A and the ♠ A K. Therefore you must plan to avoid losing a third ♠.

You should lead **UP TO** your honor cards. Cover the ♦ J and lose to East's ♦ A. Win his return (probably another ♦) in dummy. Lead a small ♠ to your ♠J. West wins with an honor and probably plays the ♦10. Ruff it, lead a ♣ to dummy and lead the last
