to hold the ♦ J, but primarily you are working to establish the ♦ suit. Assume East wins the ♦ J and returns a ♠.

Again don't hold up. Take the ♠ K and lead another small ♦, finessing with dummy's ♦ Q. Happily this time the finesse works, and even more happily both defenders follow suit. That means the rest of the ♦s are good and you make an overtrick.

This was just a normal suit-establishment Deal.

If looked different because of the two finesses you took.

South is to play 3NT. West leads the ♠ 4, dummy plays the ♠ 3 and East the ♠ J.

West plays low.

East wins with the ♦ J.

Winners: ♠=2 ♥=2 ♦=1 ♣=2 Total = 7

You need two more winners. They cannot possibly come from ♠s, ♥s, or ♣s since one defender must hold at least 4 cards in each of those suits. So your two extra winners must come from the ♦ suit.

There is no reason to hold up on the ♠ since the ♥ and ♣ suits also have just two stoppers. You win the ♠ A.

Your best play next is to finesse the ♦ 10. This may gain a trick by virtue of the finesse if West happens

you could establish the suit in dummy.

West's play of the ♣K may have made you want to jump up with the ♣A, but you must stick to the original play of ducking one trick.

South is to play 3NT. West leads the ♠4. East puts on the ♠A and returns the ♠8.

Winners: ♠=2 ♥=1 ♦=2 ♣=1 Total = 6

Needing three more winners you are going to have to establish the ♣ suit. You are also going to have to be lucky!

You win the second ♠ and play your ♣Q. West covers with the ♣K. What do you do next?

You **DUCK**. If you take the ♣A now you will never get back to dummy to enjoy those other ♣s. So let West have the ♣K. You win his return, (probably a ♠), and play ♣J, then ♣9 to dummy's ♣A. As long as ♣s split 3-2 you will get the three winners you need.

You were prepared to lose that ♣ finesse to East so

3NT by South			
Lead: ♠2			

Play the ♥A and if both defenders follow your other 2 ♥s are good and your contract is made.

Ducking the first ♥ and finessing the second could let you wind up with no tricks at all in the ♥ suit.

But, it is your only chance to make the contract.

South is to play 3NT. West leads the ♠2, dummy plays the ♠4 and East puts on the ♠J.

West plays low.

East wins with the ♥9.

Winners: ♠=2 ♥=1 ♦=2 ♣=1 Total = 6

You need three more winners. It is possible your fourth ♦ can be established, but that needs a 3-3 split. It's also possible that the ♣ finesse will work, and also the ♥ finesse. Since you need the ♥ finesse anyway you should go ahead and try to establish the ♥s.

Win the first trick with your ♠Q and play a low ♥, ducking in dummy. East will no doubt win a cheap trick but no matter. When you next gain the lead play your other low ♥ and finesse the ♥Q. Assume this wins (if it doesn't you will be going down for sure).

unless they are real novices they will hold it up one round and you'll no longer be able to reach dummy.

The solution is to establish the ♦s before you use up dummy's ♥K.

Ruff the third ♠, then play ♦Q, (which they will duck), and another ♦, (which they will probably take). Win whatever they return, pull trumps ending in dummy, and enjoy your 3 ♦ winners.

If East does not take the second ♦ you continue the suit, and whether you ruff or discard a loser you still make the contract.

Some pretty aggressive bidding gets you to a challenging game. South is to play 4 ♥. West leads the ♠K, overtaken by East's ♠A. East returns a ♠ to West's ♠10, and he then plays the ♠Q.

You ruff the third ♠.

West plays low.

East ducks.

Losers: ♠=2 ♥=0 ♦=1 ♣=3 Total = 6

With 2 tricks already gone you still have 4 losers. You could consider ruffing the 3 ♣ losers in dummy but that would just create a trump loser even when trumps are splitting 3-2. So it looks like you will have to establish the ♦ suit for discards. You could pull trumps and then play your ♦Q, hoping the defenders will grab their ♦A immediately. But

1 or 2 rounds. When he does win it he will return a ♠ and whether you play the ♠ A or a low ♠ West will be able to prevent you from reaching dummy.

But if you win the first trick with the ♠ A, then dummy's ♠ Q J will provide a guaranteed entry to the good ♥s.

North's 3♦ bid was a transfer to ♥s, and his 2NT bid showed exactly 5 ♥s with an invitational strength hand. South is to play 3NT. West leads the ♠ 6, you play dummy's ♠ 9 and East contributes the ♠ 2.

Winners: ♠=2 ♥=0 ♦=1 ♣=2 Total = 5

The math is easy - you need 4 ♥ tricks. And you should be able to manage that by driving out the ♥ A. But the defenders will probably hold up one or two rounds when you play on ♥s, so you must have an outside entry to dummy.

The ♠ Q J will provide that entry **IF** you make sure to win the first trick with your ♠ A as an unblocking move. If you don't do so then West will be able to keep you out of the dummy and away from those good ♥s.

Suppose you allow dummy's ♠ 9 to hold the first trick, then start on ♥s. East will hold up the ♥ A for

Pass	1 ♥	Pass	2NT
Pass	3NT		
All Pass			
3NT by South			
Lead: ♠ 2			

Now when you attack ♥s a defensive holdup won't hurt you because you have **TWO** ♠ entries, the ♠ J by a finesse and the ♠ K.

West is almost certain to hold the ♠ Q because his ♠ 2 opening lead promises an honor and the ♠ Q is the only one you don't have.

So the ♠ finesse is an odds-on play to get a second dummy entry.

South is to play 3NT. West leads the ♠ 2, you play dummy's ♠ 4 and East plays the ♠ 8.

Winners: ♠=3 ♥=0 ♦=2 ♣=2 Total = 7

Needing just two more winners it looks straightforward to establish dummy's ♥ suit. Suppose you win the ♠ 10 and play the ♥ 9. If the defenders win this trick you are home free. You win their ♠ return with your ♠ A, then continue ♥s to drive out their last stopper while you still have the ♠ K as a dummy entry.

This won't work against good defenders, who will hold up on the first ♥ trick and win the second. Then when they continue ♠s you won't have another ♥ to return to dummy, so while you can use the ♠ K as an entry to establish the ♥s you will never get back to use the good ones.

Instead you should win the first trick with your ♠ A.
