North is to play 6NT. East leads the ♠ 3.

Winners: ♠=4 ♥=1 ♦=5 ♣=1 Total = 11

You need one more winner from the ♥ or ♣ suit. The straight finesse of the ♥K offers a 50% chance of success. The double finesse of the ♣ K Q offers a 75% chance of success. It's a no-brainer. Run 4 ♠s and 5 ♦s ending in your hand. Be very careful not to discard a ♣ from your hand.

You have run the ♠s and ♦s and are in your hand.

East plays low.

A small ♣, playing the ♣10 when East plays low: the first of your two ♣ finesses. Let's say West wins the ♣K and returns a ♥.

West returns the ♥J.

DO NOT FINESSE THE ♥. Stick with your original 75% plan. Take the ♥A and play your small ♣, finessing the ♣J. This is why you couldn't discard a ♣ earlier.

The single ♥ finesse is an inferior play because its success depends on West holding a specific card, the ♥K.

The double ♣ finesse is much better because its success depends on East holding either of two cards, the ♣Q **OR** the ♣K.

fact, there is only one reasonable choice. If you finesse the ♠K successfully you may still have a ♠ loser. If you finesse the ♥K successfully you will surely still have a ♥ loser. But if you finesse the ♣K successfully you will eliminate your ♣ loser.

What a great layout! Three possible finesses and every one of them would work.

But as you can see, only the ♣ finesse will actually save you a trick.

East is to play 4♠. South leads the ♦K.

North plays the ♦2 and you the ♦4.

Losers: ♠=1 ♥=1 ♦=1 ♣=1 Total = 4

South has made another great lead. Any other suit would have given you a free finesse. You should duck the first ♦. It is very possible that South has led from ♦K Q 10 and will be afraid to continue for fear you have the ♦J in your hand. You'd be very happy to see him switch to any other suit. But he doesn't.

South continues with the ♦Q.

You take it with dummy's ♦A.

You are in dummy for the first, last, and only time.

You need to try a finesse right now, but which one?

At first you might think it makes no difference but, in

the ♣K you will ruff, enter dummy, and discard two red losers on the ♣ J 10. If East plays low instead, you discard your ♥ loser. West may be able to win the trick but you can ruff a ♥ return, and dummy will have two good ♣s on which you can discard 2 ♦ losers.

Ruffing finesses sometimes provide you the best opportunity, like this time.

But they are easy to overlook, mainly because we don't use them often.

South is to play 6♠. West leads the ♥K, dummy plays the ♥6 and East the ♥3.

Losers: ♠=0 ♥=1 ♦=2 ♣=0 Total = 3

Your only hope for ridding yourself of two of those losers is dummy's ♣ suit. One possibility would be to finesse West for the ♣K, and if that works, discard your ♥ loser on the ♣A. You could then establish another ♣ winner for one of the ♦ losers. The problem with that plan is that if the finesse fails the defense will immediately take the setting ♥ trick.

A better plan is a ruffing finesse. Win the first trick with your ♥A and pull trumps with your ♠ K Q.

West plays low.

Your ♣7 to dummy's ♣A.

The ♣Q from dummy: a ruffing finesse. If East plays

and South discards a ♠.

You cash four rounds of ♣s, ending in your hand.

North covers with the ♥Q.

Now play the ♥J. If North doesn't cover, you will let it ride for your ninth trick. But North does cover so you take dummy's ♥A, then your other 2 ♥ tricks. The ♠A is your ninth trick.

You might think that a two-way finesse offers you a 50% chance of guessing correctly.

Sometimes that may be right. But there are other times when information from the bidding or the opening lead allows you to make a higher-percentage guess.

West is to play 3NT. North leads the ♦K, dummy plays the ♦3 and South the ♦2.

Winners: ♠=1 ♥=2 ♦=1 ♣=4 Total = 8

You only need one more winner. If South has the ♠K you can finesse him out of it. Or, you have a two-way finesse for the ♥Q.

It is an easy choice. The defenders only have 12 HCP and North opened the bidding. So you know he must have both of the cards you are interested in.

Hold up the ♦A until the third round just to be safe. Then play four rounds of ♣s ending in your hand.

North continues with the ♦Q; dummy plays the ♦6 and South the ♦8.

North continues with the ♦J; dummy plays the ♦7
