The bidding has been as shown.

When you have a weak, distributional hand with 5 of partner's suit an immediate jump to game is usually the best approach. If he has a good hand you will probably make the contract. If he is minimum then you might get a preemptive effect and stop your LHO from entering the bidding.

This is a good example. Partner may be lucky and make 4 ♥. But if they had had an opportunity to compete the opponents might well be able to make 4 ♠.

You can't support partner's ♥s with only 2 of them so you bid your nice ♠ suit. Partner then jumps to 3 ♥. Now

Here's where a lot of players go wrong. Since they only promised 4 ♠s with their first response they think they should now rebid them to show partner they had 5. And this **MIGHT** work if it turns out partner has 3 ♠s. Not only is this a risky bid, it is unnecessary. When partner jump rebid ♥s he showed 16-18 points and 6 ♥s. So you know of an 8-card fit and you know you should be in game. Bid 4 ♥.

The bidding has been as shown.

As soon as partner opens 1 ♠ you know you will settle for nothing less than the ♠ game. The problem with bidding 4 ♠ right now is that partner will take you for the "weak-distributional-with-five-trumps" hand. So you temporize by first bidding 2 ♣. Partner rebids 2 ♦.

You now jump to 4 ♠, completing the picture of an opening hand with good ♠ support. Partner bids 4NT. What say you?

This is Blackwood so you answer 5 ♦ for one Ace. Partner says 6 ♠.
