You have a limit raise in ♠s; if West had not overcalled you would have bid 3♠.

Instead, you cue-bid 3♥, promising at least 11 points and support for ♠s. Partner bids the game.

Partner has a limit raise or better in ♠s.

With your 17 revalued points you know that your side has at least enough for game, so bid 4♠.

You have a pretty good hand and if partner has a limit raise or better you should bid 4♥.

But partner doesn't have a limit raise - if he did he would have cue-bid. So you pass.

You would have bid 2♠ if West had not overcalled.

Instead, with 4 trumps you can jump to 3♠ as a preemptive measure. Partner will not mistake this for a limit raise since you would have cue-bid with 11+ points and support.

The jump to 3 is based on the Law of Total Tricks - bidding to a trick level equal to the number of your side's trumps.

You have 14 points in support of ♠s; however, partner's overcall does not promise more than 9 points or so.

So you cue-bid 2♥, showing a good hand with support and forcing partner to bid again. Partner bids 3♠.

4♠. Partner's jump shows a good overcall, but not enough strength to insist on game when you might have only 11 points. You have plenty extra so you bid the game.

You have 12 points in support of ♥s; however, partner's overcall does not promise more than 9 points or so.

So you cue-bid 2 ♣. Since the opponents have bid two suits you can cue-bid either one of them, so you usually pick the one you have the most strength in. Partner bids 2 ♥.

Pass. Partner had a minimum overcall so he made a minimum rebid.

You have about 15 points in support of ♥s so you cue-bid 3♣, showing a limit raise or better and forcing partner to bid again. Partner bids 4♥.

5♣. Partner's jump shows a good hand and you have more than you have promised so far. This cue-bid is a different type, showing first round control in ♣s, Ace or void. That was apparently what partner wanted to hear since he went right to slam.
