4♠ by North

If the defender who won the ♦K plays a ♦ or a ♣ you will ruff in your hand and discard dummy's ♥ loser. So that defender is going to have to lead a ♥.

If it is East who won the ♦K you are home free. His ♥ play will give you two ♥ tricks.

If it is West who won the ♦K you still have a chance. He will lead a ♥ and you will finesse the ♥Q.

In other words, played this way you make the contract whenever East holds the ♦K **OR** West holds the ♥K.

.

With the cards as shown the elimination play works.

But if the ♦K is with West and the ♥K with East it wouldn't.

Of course it is POSSIBLE that if you played a low ♦ from dummy some Easts would duck and let you win a trick with your ♦Q.

This trickery would fail if East held the ♦K, or if West held it and went up right away.

South first transfers you to ♠s, then closes the auction with 4♠.

North is to play 4♠. East leads the ♣2. West takes the ♣A and returns the ♣9 to East's ♣K. East plays another ♣ to your ♣Q.

With two tricks lost already you have a sure ♦ loser (unless the defenders goof) and a ♥ loser that might be taken care of if West holds the ♥K. But what if East holds the ♥K? Maybe an elimination play.

First pull trumps - they split 2-1.

Next eliminate ♦s by playing ♦A then another ♦. This does the elimination and throw-in at the same time.

will be into dummy's ♦ K J. If he plays a ♥ you will discard a ♦ from your hand and ruff in dummy. If he plays the ♠ K you will ruff, and dummy's ♠ Q will be promoted. If he plays a small ♠ you will let it ride to dummy's ♠ Q.

A fairly complex elimination play to finish off the set.

I hope you enjoyed them.

South plays 6 ♣. West leads the ♠ 8.

You have one ♠ loser and one ♦ loser. A successful finesse will take care of either one of them. Chance of the ♠ finesse working? Zero. Chance of the ♦ finesse working? Maybe 50%. Chance of an elimination play? Priceless.

Win the ♠ A and pull trumps with the ♣ A and ♣ Q. They split 2-1.

Play the ♦ A, just in case there is a singleton ♦ Q somewhere. There isn't. Then eliminate ♥s by playing ♥ A and ruff a ♥.

Now play a low ♠ from both hands. West doesn't follow suit as East wins with a small card.

East is end-played. He has no ♣s. If he plays a ♦ it
