6♣ by North			

North is to play 6♣. East leads the ♦Q.

Losers: ♠=0 ♥=2 ♦=1 ♣=0 Total = 3

Partner's hand didn't turn out to be what you hoped for, you had in mind maybe the ♥K and ♦Q.

But this is what you got. First, be thankful East led a ♦ rather than a ♥. Second, see if you can find a way to fight yourself over to dummy and those three beautiful ♠s.

You have two possibilities for a ♣ entry, but you can only try one of them as you will see.

You can play a high ♣ and hope somebody plays the singleton ♣10. Then your ♣9 would be an entry. If this works you would probably make all 13 tricks, but the chances are very slim.

You can play a low ♣ to dummy's ♣8. Assuming a defender takes the ♣10 you can win his return and enter dummy with the ♣9. This play is guaranteed to give you the entry and is the one you should choose.

Just in case you were wondering about the chances of that singleton ♣10, here is how you would figure it out.

When you are missing 4 cards the probability of a 3-1 split is about 50%.

But the singleton can be any one of four cards - in this case it can be the ♣10, ♣6, ♣3 or ♣2. So the chance of one of the opponents holding specifically the singleton ♣10 is only one-fourth of 50%, about 12.5%.

hand, then unblock the ♣A, then pull trumps in 3 rounds ending in dummy. And run all those ♣ tricks. If South plays a trump or a ♣ the result will be the same. The defense can get one ♦ trick if they take it right now, but you still make your contract.

East is to play 4 ♥. South leads the ♠A, then ♠K.

Losers: ♠ = 1 ♥ = 0 ♦ = 3? ♣ = 0 Total = 4?

This is the kind of hand that can get really messy if you aren't careful. You could ruff the ♠, then try to ruff some ♦s, but the defense can prevent you by leading trumps when you give up the ♦ tricks.

All in all a much better plan is to use dummy's ♣ suit after you unblock the Ace. The only flaw with that idea is that when you ruff the ♠, unblock the ♣A, then play two rounds of trumps ending in dummy, there will still be a trump left out. And the defender might ruff a ♣ before you can take the discards you need. Do you see a way around this?

Do NOT ruff the second ♠ in dummy, just discard a ♦. If South plays a third ♠ you will ruff in your

It is an important concept. When you have to use a trump as a later entry you could thwart your own plan by ruffing.
