3NT by North

Yet another variation on the theme.

There are two basic types; one where you give up a winner to gain an entry, and this type where you get the entry without giving up a thing.

It looks a little different, but the theme is the same. PROTECT YOUR ENTRY.

North is to play 3NT. East leads the ♠9, and West plays the ♠K.

Winners: ♠=3 ♥=2 ♦=1 ♣=0 Total = 6

I'll bet you got this one. The extra ♣ tricks you need are winnable only if you can get back to your hand after knocking out the ♣A. But the only possible entry card is the ♠A. If you use it on the first trick the Defense will hold up their ♣A for one trick and your hand will be shot..

So let West keep the first trick, (sacrificing one ♠ winner), and take the next ♠ in dummy. Then establish ♣s.

You sacrifice one ♠ trick for four ♣ tricks. A good deal.

3NT by South
need an extra dummy entry to enjoy that last winner.

So win the ♥K and play the ♦ K Q. If both defenders follow suit you can afford to overtake your ♦J with dummy's ♦A. Now play the ♣10 and let it ride. If it holds the trick play another ♣ to your ♣J and then play the ♣A, dropping East's ♣K.

Enter dummy by playing your ♦3 to the ♦6 and take your established ♣ for the ninth trick.

Suppose a defender showed out on the second ♦.

With only one outside entry to dummy your choices are limited.

You might play East for ♣ K x and lead a small to your ♣J, then play ♣A.

Or you might try leading the ♣Q hoping that East will see this as a time to "cover an honor with an honor".

South is to play 3NT. West leads the ♥3, you play dummy's ♥J and East plays the ♥Q.

Winners: ♠=0 ♥=1 ♦=4 ♣=1 Total = 6

Unless you want to go down really, really early you had better take your ♥K right now. And unless you want to go down almost as early you'd better stay completely away from the ♠ suit. So that only leaves you the ♣ suit to get 3 more winners in. East will have to have ♣K so you can finesse it. You are also going to have to be smart with entries. Got it?

If East has just ♣ K x then one finesse, followed by the ♣A to drop the ♣K and a small ♣ back to dummy will give you the 4 ♣ winners you must have. But if East has ♣ K x x and refuses to cover then you will be able to establish the ♣s but will
