3NT by North

You were lucky the ♥A was with West.

North is to play 3NT. East leads the ♦K.

Winners: ♠=4 ♥=0 ♦=1 ♣=1 Total = 6

You need 3 more winners, and they must come from the ♥ suit. The danger is that when you knock out the ♥A, East may take too many ♦s. To exhaust West of ♦s you hold-up your ♦A until the third round.

Next you start on ♥s by playing ♥K, then overtaking the ♥10. Assume that West wins the second ♥.

You were fortunate it was West who took the ♥A, and that he has no ♦ to return. If he plays a ♥ or a ♠ you will win in dummy. If he plays a ♣ you will jump up with the ♣A and take your winners, 9 in all.

But if you had not held-up your ♦A even good luck wouldn't have helped you.

3NT by East bank; ♠A, ♦K, ♦Q. You take your ♥K, cash the two good ♦s, then lead to dummy for the ♣A K and ♥A. Voila!

You were lucky that North had the ♦A since he only had 3 ♠s.

But what if North actually held 4 ♠s? No problem, in that case the ♠s would have split 4-4 so the defenders could only win 3 ♠ tricks and the ♦A.

The hold-up lets you make the contract whenever North holds the ♦A. And if South happened to hold the ♦A??? You go down.

East is to play 3NT. South leads the ♠K.

Winners: ♠=1 ♥=2 ♦=0 ♣=2 Total = 5

Even if ♥s split 3-3 you could only get 2 extra winners there, so it should be clear that you must establish the ♦s. You will have to drive out the ♦A and hope they don't win too many ♠s at that time. You can help your chances by a hold-up of the ♠A until the third round.

Having just taken the third ♠ trick you now work on ♦s by first playing the ♦K, then continuing the suit. North wins the third one with his ♦A. And now the good news - he has no ♠ left to reach his partner's good tricks. So North plays the ♥Q.

At this point in the play you have three tricks in the
