3NT by South

Start on ♦s next, maybe because they are longer. Assume that West holds the ♦A and takes it on the third round of the suit.

West glares at you, (because he has no ♥ to lead), and plays the ♣Q which you take with your ♣A. Next you score your ♦ winners and play a ♠, taken by East with the ♠A.

[showcards N:ST,S6,C8,C7 S:SK,SJ,CK,CT]

East glares at you, (because you still have the ♥A), and plays another ♥ to your Ace. You take your 3 tricks and let West have the last ♣.

If you did not hold up on the first trick, but established ♦s first you would not have made the contract.

If you did not hold up on the first trick, but established ♠s first you would have made the contract even though you played incorrectly.

If you held up on the first trick you made the contract no matter which Ace West held.

South's 2NT overcall shows a 1NT opening hand with ♥s stopped. South is to play 3NT. West leads the ♥7. East plays the ♥10.

Winners: ♠=0 ♥=2 ♦=0 ♣=2 Total = 4

You will need to establish both ♠ and ♦ winners. If East holds both these Aces along with 6 ♥s to the Q J then you are going down. But of course East can't have that good a hand, he opened with a Weak-2. So West has one of the Aces.

If you knew which Ace East held you could make sure you attacked that suit first but unfortunately you have no way of knowing that. So instead you resort to a hold-up. Let East have the first ♥ and win the next ♥ in dummy.

you throw out your ♥7 rather than the ♥3. Now West may think that East is encouraging him to continue, just what you want.

Sometimes it works, sometimes it doesn't.

I sure hope that when you play this hand West falls for your Bath Coup.

Because if he doesn't you're going to have to end-play him.

Do you see how that might happen?

South is to play 3NT. West leads the ♥K. East plays the ♥6.

Winners: ♠=3 ♥=1 ♦=1 ♣=3 Total = 8

You just need one more winner and it could come from the ♦ suit if it happens to split 3-3. But you have another possibility. Suppose you let West hold the first trick and he decides to play another ♥? You would have two ♥ winners.

This isn't a true hold-up play although it does look like one. This play has the rather fancy name of Bath Coup, (named from Bath, England). Presumably West has led from ♥ K Q 10 9 5 and East has played his singleton ♥6. If West realizes that East has played his lowest card he will take that as a discouraging signal and will play a different suit. So
