North is to play 6NT. East leads the ♠K.

You have 11 winners; 1 ♠, 2 ♥s, 4 ♦s and 4 ♣s. If you can make a trick with the ♠J all will be well. But if not, as long as East holds the ♠Q, which is almost a certainty, you will be able to squeeze him in ♠s and ♥s.

The first thing you should do is to duck the ♠K. If East foolishly plays another ♠ your troubles are over. But he doesn't, he plays the ♥Q instead which you win with dummy's ♥K.

Next play off your 4 ♦ winners, discarding a small ♥ from your hand.

Even though East didn't play a second ♠ your first round duck served a very important purpose - it rectified the count for your squeeze.

You are now zeroing in on East.

Play the ♣K, ♣J, then over to your ♣Q.

Here is the layout after the 3 ♣ plays. Everybody followed suit except East who discarded a ♥ (unhappily, it seemed).

When you now play your ♣A, discarding a ♠ from dummy, East is squeezed.

If he discards the ♠10, then his ♠Q will fall underneath your ♠A, establishing your ♠J.

But if he instead throws the ♥9, both of dummy's ♥s will become winners.

East now holds the the only guard in ♠s.

Play the ♦ A, then ♦ K Q.

East will follow to all three ♦ s.

Now for the squeeze. Play dummy's ♦ J and discard your ♥ 10.

If East discards the ♠ J you will cash dummy's ♠ 6, then win the last 3 ♣ tricks.

So East will no doubt throw a ♣ instead. In which case you win the last 4 ♣ tricks.

Squeezes are so very satisfying.

South is to play 6NT. West leads the ♥ K.

As usual, you have 11 winners; 3 ♠s, 1 ♥, 4 ♦ s and 3 ♣s. If ♠s split 3-3 dummy's ♠ 6 will become trick #12. If ♠s don't split though, you will have the chance of a squeeze if the defender with long ♠s also has 4 or more ♣s.

For a squeeze to operate you will need to lose one trick and the time to do that is right now. Let West hold the ♥ K and win his ♥ continuation with your ♥ A.

East discarded a ♦ on the second ♥.

You might as well find out about the ♠s right now. Play the ♠ A K Q.

Too bad, West discards a ♥ on the third round of
