3NT by North

Suppose you allow dummy's ♠9 to hold the first trick, then start on ♥s. West will hold up the ♥A for 1 or 2 rounds. When he does win it he will return a ♠ and whether you play the ♠A or a low ♠ East will be able to prevent you from reaching dummy.

But if you win the first trick with the ♠A, then dummy's ♠ Q J will provide a guaranteed entry to the good ♥s.

South's 3♦ bid was a transfer to ♥s, and his 2NT bid showed exactly 5 ♥s with an invitational strength hand. North is to play 3NT. East leads the ♠6, you play dummy's ♠9 and West contributes the ♠2.

Winners: ♠=2 ♥=0 ♦=1 ♣=2 Total = 5

The math is easy - you need 4 ♥ tricks. And you should be able to manage that by driving out the ♥A. But the defenders will probably hold up one or two rounds when you play on ♥s, so you must have an outside entry to dummy.

The ♠ Q J will provide that entry **IF** you make sure to win the first trick with your ♠A as an unblocking move. If you don't do so then East will be able to keep you out of the dummy and away from those good ♥s.

3NT by East

Instead you should win the first trick with your ♠A. Now when you attack ♥s a defensive holdup won't hurt you because you have **TWO** ♠ entries, the ♠J by a finesse and the ♠K.

South is almost certain to hold the ♠Q because his ♠2 opening lead promises an honor and the ♠Q is the only one you don't have.

So the ♠ finesse is an odds-on play to get a second dummy entry.

East is to play 3NT. South leads the ♠2, you play dummy's ♠4 and North plays the ♠8.

Winners: ♠=3 ♥=0 ♦=2 ♣=2 Total = 7

Needing just two more winners it looks straightforward to establish dummy's ♥ suit. Suppose you win the ♠10 and play the ♥9. If the defenders win this trick you are home free. You win their ♠ return with your ♠A, then continue ♥s to drive out their last stopper while you still have the ♠K as a dummy entry.

This won't work against good defenders, who will hold up on the first ♥ trick and win the second. Then when they continue ♠s you won't have another ♥ to return to dummy, so while you can use the ♠K as an entry to establish the ♥s you will never get back to use the good ones.
