[showcards W:DJ]

You are West. The bidding has been as shown, (wild).

Partner led the ♦J; ♦Q from dummy, ♦K from you and ruffed by North.

North then pulls two rounds of trumps, (East discards on the second one), followed by his ♠Q, dummy's ♠A K and dummy's ♦A. North discards ♣s on the last two cards.

6♥ by North

with 2 ♠s, 7 ♥s, and no ♦s. His other 4 cards must have been ♣s, and he has discarded 2 of them.

The ♣6 is then played from dummy and you must make a decision - ♣A or ♣2?

Play the ♣2.

You have a full count on North's hand. He started

So he has 2 ♣s left in his hand. If one of them is the ♣K and you play your ♣A then you have handed him the contract.

By playing low you give him a guess to make. If he plays the ♣K he will make the contract, but if he plays the ♣J he will go down. He will probably play the ♣J, figuring you wouldn't have the nerve to duck with the ♣A. He'll know better next time he plays against you.

3NT by South

DOES have this card; otherwise South has his 9 tricks.

[showcards S:C9]

You are West. The bidding has been as shown.

You lead the ♦5; ♦3, ♦10 and won by South with ♦K. South now leads the ♣9 from his hand

Play the ♣A.

First ask yourself "Where are the ♦A and ♦Q?" East doesn't have either one or he would have played it at the first trick. So South has both of them. So with those 3 tricks and the 5 ♥s in dummy South only needs to find one more winner. Assuming he has the ♣K, (or why play the suit), if you play low he will find that one more winner whichever high ♣ he plays.

Next ask yourself "Where is the ♠A?" Clearly East

So the way to beat the contract is to go up with your ♣A, then play ♠K, ♠Q and a third ♠, hoping East holds ♠A x x x.
