harder for North. Sometimes he will guess correctly and play dummy's ♣K, but other times he will play dummy's ♣J, hoping you have the ♣Q.

[showcards S:C2]

You are East. The bidding has been as shown.

You lead the ♠J, the ♠K is played from dummy and holds the trick. Next come dummy's ♥K, then another trump to North's ♥A.

At trick 4 North plays the ♣2 from his hand and you must decide what to play.

Play the ♣3 (smoothly).

North has 2 small ♣s and faces a choice of dummy plays in the suit. He must decide whether to play you for the ♣A or the ♣Q. If you play your ♣A you make the decision very easy for him.

When you correctly play your small ♣ life becomes

like he may have 1 ♠ left, very likely the ♠K.

All this means that you should take your ♦A now and return your last ♠ to establish South's suit. Now South's ♦K will be an entry to the ♠s

If you play low, South will have to take the ♦K now, and although he can play a ♠ to establish the suit, he will not have an entry to be able to cash them.

[showcards N:D2]

You are North. The bidding has been as shown.

Partner led the ♠6. You won the ♠A and returned the ♠9, won by East's ♠Q.

East next played to dummy's ♣A and led the ♦2. What do you play?

Play the ♦A.

Count the points. East's 15-17 plus West's 11 plus your 10 comes to 36-38. So South has room for an Ace or a King, but no more.

South's second ♠ play was the 2, so it looks like he started with 5 ♠s. And the fall of East's ♠s looks
