Ahh, what a difference. Now declarer cannot use the ♥s to enter dummy and he will never get to enjoy those two ♣ winners.

[showcards W:HT N:HJ]

The bidding has been as shown. Partner led the ♥10, dummy played the ♥J

Play the ♥6.

Declarer gets two ♥ winners whether you play one of your honors on this trick or not. So why does it matter what you do?

Suppose you cover with your ♥Q. North will win his ♥A, then play ♣s until your ♣A is forced out on the third round. He can then force an entry to dummy in the ♥ suit to reach the two ♣ winners.

Now suppose you duck the ♥J. Again North will push ♣s, and again you hold up until the third round.

The contract could no longer be beaten.

Now do it the right way. Play your ♠K on partner's ♠Q. Assume South takes the trick, although it doesn't matter whether he wins the first one or holds up. When you win your first ♣ drive out South's ♠J. When you win your second ♣ trick your ♠s will be good. If you overtake the first trick the contract can no longer be made.

Notice that South will always make two ♠ tricks, so your overtake costs nothing.

[showcards W:SQ N:S2]

The bidding has been as shown. Partner led the ♠Q, a low card was played from dummy,

Play the ♠K.

It seems that perhaps you should play low and let partner's ♠Q force out South's ♠A. Then, when you get the lead with a high ♣ you can force out South's ♠J. Get the lead with your other high ♣ and set the contract with ♠s.

Suppose you try that. Play low on the first ♠. South will also play low and West will be left holding the trick, and also holding the bag! With no more ♠s West will have to play one of the other three suits, and that is just what South wants to have happen.
