3NT by North
the ♥7.

North plays 3NT. East leads the ♥2, West wins the ♥A and returns the ♥5. East takes the ♥K and plays the ♥7.

Winner count: ♠ 2 : ♥ 2 : ♦ 2 : ♣ 2 : Total = 8

You are glad the defense started with ♥s, that was a suit you would have had to play yourself. You need one more winner and your first thought may be that the ♠s are going to have to split 3-3. However, that happens only about 40% of the time so you keep looking. There is one more card that might be valuable, the ♣J. If West holds the ♣Q then you can make a trick out of the ♣J.

You are already in dummy with the ♥J so you lead a small ♣. If West plays low you will play the ♣J which will hold the trick and become your 9th winner. If West plays his ♣Q you will have the ♣J for your 9th winner later.

And if West doesn't have the ♣Q at all? then you **STILL** have the possibility of a 3-3 ♠ split.

As you see, this time the ♠s didn't split so you had to make the ♣J to succeed.

You have 13 points so you will definitely open the bidding. You don't open with a 4-card Major and you don't open with a 2-card ♣ suit. So this is the one distribution where you open a 3-card ♦ suit. Partner responds 2♣ and

Be very careful! You are tempted to now bid 2♥ or 2♠. Don't give in to the temptation. That would be a **REVERSE** - bidding a second, higher-ranking suit at the 2-level. You should have at least 16 points to reverse. Besides, if you trust partner you don't need to bid either of those suits anyway. If he had a 4-card Major he probably would have shown it on his first bid. No, your next bid is clearly 2NT. Partner raises to 3NT and you pass.

4 ♠ by East

But he didn't open, so he doesn't have the ♠ K.

You open 1 ♠. South overcalls 2 ♥ and partner bids 4 ♠.

East plays 4 ♠. South leads ♥ A, ♥ K, ♥ Q.

East plays 4 ♠. South leads ♥ A, ♥ K, ♥ Q.

Losers: ♠ 1 : ♥ 2 : ♦ 1 : ♣ 0 : Total = 4

You have already lost the 2 ♥s and you will definitely lose the ♦. So you cannot lose a ♠ as well. When you have 11 cards in a suit missing the King, the recommended play is to play for the drop. But the recommended play shouldn't be used on this hand because you know that North has the ♠ K. How do you know this? Because South has turned up with 10 points in ♥s, (the A K Q and a fifth one). If he held the ♠ K as well he would have had 13 points and a good suit and would have opened he bidding.

Ruff the ♥. Play the ♦ 8 to dummy's ♦ 10. If North takes the ♦ A win his return and enter dummy with the ♦ Q. When in dummy lead the ♠ Q and finesse North out of his ♠ K.

You have to listen to the bidding and draw conclusions from what is bid - and not bid. Because he passed originally you could figure out that South could not hold the ♠ K. Or, if you had needed to know, he could also not have had the ♦ A.
